

THE BEST BUSINESS SCHOOLS
IN THE WORLD.

ONE ACCREDITATION REPRESENTS
THE HIGHEST STANDARDS IN THE
WORLD, AND HAS SINCE 1916:
AACSB INTERNATIONAL.

AACSB International business and accounting accreditation represents the highest standard of achievement for business schools worldwide. For students seeking the finest education, and companies seeking high-caliber talent, AACSB International accreditation is one of the most important affirmations of the right choice of business school.

EARNED EXCELLENCE

THE BEST BUSINESS SCHOOLS
IN THE WORLD

RELEVANCE, GROUNDED IN
AN ELITE TRADITION.

Seventeen of the most prominent business schools in the United States, including Columbia University, Cornell University, Dartmouth College, and Harvard University, founded AACSB. As longstanding members of AACSB, these prestigious institutions speak to a timeless tradition of exclusivity and excellence.

This tradition remains relevant and forward-looking. AACSB International accreditation continuously challenges business schools to perform at the highest level. Prospective employers are assured that graduates come from a program where the content and quality has been rigorously evaluated by a team of peer reviewers, including deans of some of the world's most prestigious business schools. This process determines that programs at AACSB International accredited schools are current, provide relevant knowledge and practices, and reflect an understanding of today's complex business environment.

EARNED EXCELLENCE.

Less than one-third of U.S. business schools and only 15% of business schools worldwide meet the rigorous standards of AACSB International accreditation. This distinction is an achievement requiring a tremendous amount of effort. It tells prospective students, faculty, business recruiters, and employers that this school produces graduates who are prepared to succeed in the business world.

AACSB International accreditation assures stakeholders of earned excellence. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. Accredited business schools set forth a thoughtful and strategic plan, and then marshal the resources to achieve a vibrant and relevant mission. Curricula are evaluated in terms of outcome. AACSB International accreditation demands a superior faculty, supporting high-caliber teaching and meaningful interaction between students and faculty.

A HIGHER AIM.

Just as business leaders face rising expectations for their performance and the performance of their organizations, programs in business management education must also pursue higher standards. AACSB International has been dedicated to continuous relevance and improvement since the adoption of the first standards in 1919. Additional standards for programs in accountancy were adopted in 1980. AACSB International accredited members approved mission-linked accreditation standards and the peer review process in 1991. In 2003, accredited members approved standards that are relevant within the context of business programs around the world.
