

Alpha Phi WATCHCARE Policy

WATCHCARE began with our Founders, who bonded together to support each other for mutual growth. These women were vigilantly concerned about their sisters, people they cared about a great deal. They came up with three components of Watchcare.

1. The first component is **the preservation of human dignity**. Dignity means being worthy and honorable. Pride and self-respect. Preserving integrity and self-esteem. Dignity is caring.
2. The second component is **risk management**. Our primary concern is the physical, psychological and emotional well-being of our members. The safety of members is a responsibility of every Alpha Phi.
3. The third component is the **development of solid values and ethics**. We need members who will carry out the vision of our Founders, members who are role models because they have gained respect for their ethical principles, who are known to be honest and truthful, and who have positive life goals.

The WATCHCARE Message:

“Hand in hand we will stay safe and grow to meet our highest potential.”

I understand and agree to follow the above stated WATCHCARE policy. I will do all I can to make sure this policy is followed. I understand that this includes watching out for my sisters, and respecting and trusting them enough to allow them to watch out for me.
