IMPORTANT NOTES:

Doing the required gen-ed, CBA courses, and FIN courses (and nothing else) would put you at **97 credits**. That means you need **23 more to get to the 120 required to graduate**. These could be courses that apply towards a minor or double-major. Any time you can't fill out a full schedule with the required courses, remember that you eventually need 120 to graduate. Due to the high demand for CBA courses, you may want to consider programs outside the CBA.

Also, these requirements are specific to the current University Catalog. These requirements apply to students entering UWL Summer 2022 or later. Be sure to check your WINGS advisement report to be sure your requirements are not different.
