NATIONAL COUNCIL OF  
TEACHERS OF MATHEMATICS

Are you looking for ways to get more involved with mathematics education? Would you like to collaborate with others who share the same desire to be an effective teacher? Join the Wisconsin Mathematics Council for a Collaboration and Networking Night. You will work with experienced math educators, collaborate with other pre-service teachers, and learn about resources and organizations that can help you be successful.

The benefits of this Collaboration and Networking Night are endless. Here are a few of them:

-  Learn about professional math organizations that can support you as a new teacher.
-  Meet math faculty who can support you in your program of study.
-  Meet other K-8 pre-service teachers who want to discover best practice ways to teach math.
-  Gain experience using the SMART Board as an innovative tool to teach math.
