Setting up a Wii for Internet Connectivity

Students with a Wii are required by the University of Wisconsin-La Crosse to follow the directions listed below in order to gain internet connectivity for their Wii gaming console. Please read the instructions carefully and follow them in order.

- Apart from the standard Wii connection procedures, you must register your Wii with ITS Network Services before you can begin playing online.
- From the Wii Channel menu, select **Wii Settings** (the round button on the bottom-left of the screen with "Wii" on it).
- Select **Internet**, then **Console Settings**.
- On the first line, you will see a combination of twelve letters and numbers. Write it down, and email perfigo@uwlax.edu and tell us the MAC address and the name of the Residence Hall you live in (i.e. Reuter, Hutchinson, Trowbridge, ect.). When we receive the MAC address you submitted, your game console will be allowed to access the UW-L network.
- We will let you know when an IP address has been created for your console. After that, you should be able to connect to Wii Online.
