## Course Description

The Advanced Clinical Instructor Credentialing Program brings two constructs together in one professional development program that advances both clinical teaching and best practice when providing student clinical education. Using a case-based interactive approach to education, this program provides participants with the essential knowledge and skill to more effectively teach and mentor students in the context of a doctoring profession. Through the program's unique philosophy and design, best outcomes will be achieved for student learning by concurrently advancing concepts of clinical teaching and clinical practice.

## Program Outcomes

At the conclusion of the program, CIs will be able to teach using pedagogical methods that enable learners with patients/client to integrate more complex concepts by demonstrating:

- Consistent application of professional standards and regulations
- Autonomous practice, professionalism, EBP, and elements of Vision 2020
- Correct use of the patient/client management model
- Clinical decision making
- The importance of lifelong learning through an individual professional development plan
- Professional communication, including documentation

CIs will be more effective and efficient practitioners and clinical instructors by:

- Advancing clinical teaching concepts learned in the CI education and Credentialing Program (Level I)
- Synthesizing information from APTA, FSBPT, CAPTE, and State & Federal regulations
- Modeling, integrating, and promoting behaviors congruent with and reflective of Vision 2020 and the core values
- Achieving successful patient/client and student outcomes through use of best practice information
- Living the philosophy of lifelong learning
