About the new dean of CSH

What I have learned from my journey in higher education...

Ju H. Kim
Having research experience as an undergraduate student was a big bonus.
1985 - 1990:
Ph.D. student in Physics

Learned about the phenomena of superconductivity.

Kathy Levin,
Professor of Physics

Learned how to do scientific research.
1990 - 1993: Post-doctoral research associate

“Just work till midnight, you need to relax too”

Learned how to perform independent research.
1993 – 1996:
Post-doctoral research associate

Learned how to enjoy doing science.

“Crystal ball is not necessary, your badge says it all: NO FORTUNE!”

Lev P. Gor’kov, Professor of Physics
J. Robert Schrieffer, Eminent Scholar Professor
1996 – 2015: Faculty member in the Department of Physics and Astrophysics

1996 - 2000: Assistant Professor
2000 - 2005: Associate Professor
2005 - 2015: Professor

Teaching is a lot harder than it appears.
2011 - 2015:
Chair of the Physics and Astrophysics Department

For student success and success of the Department, I need to support faculty and staff.
Helping faculty and students through academic administration is much more enjoyable than I thought, but clear communication is essential.

For student success, the most important part of the college is faculty and staff. Learned that I need to empower them.
Importance of partnership between industry and college, and community engagement.

Solving real-world problems requires multi-disciplinary collaborations.

Breaking down silo mindset creates synergy for the college and better learning opportunities for students.
