

Immunization Policy

Students in the UWL Athletic Training Program complete clinical rotations at various sites and settings and therefore, the following immunizations or immunity titer are required to participate at those various sites.

- Hepatitis B
- MMR (Measles, Mumps, and Rubella)
- Polio
- Tetanus/Diphtheria/Pertussis
- Varicella
- COVID-19
- Influenza (annually)

Students must complete the “Athletic Training Program Required Immunizations Form” and provide official documentation from a healthcare professional or organization of their immunizations and TB Skin test results (annually) before they can begin clinical rotations. We respect that a student may elect to not receive immunizations for personal or medical reasons; however, students should be aware that this may impact their clinical education and matriculation through the program. All students must complete and submit a “Declination of Immunization Information & Immunization Responsibilities Form”.

A TB Skin test must be completed annually; if a student has had a 2-Step Test within the last 12 months, they may have a 1-Step test annually, otherwise a 2-Step test must be done initially.
