

GROW

school gardens &
farm experiences

GROW is a non-profit on a mission to connect children to healthy food and nature through our eight school gardens that focus on hands-on learning experiences that will positively impact children's overall health for a lifetime.

GROW offers hands-on education sessions in an outdoor environment. We teach garden lessons connected to curriculum standards, mindfulness techniques, taste tests, and help get fresh food into the cafeterias!

GROW cares for a greenhouse where we are able to train our interns, prepare transplants, and educate in the winter months.

I had the privilege to attend garden expo's, the WI School Garden Network Training, WI Environmental Health Conference, advocated for clean water in WI, & many more networking opportunities.

GROW adapted to COVID through Virtual Learning Lessons, Zoom meetings with local food groups, and distribution of at home garden kits.

THANK YOU GROW!
