

# Have You Considered Health Information Systems Management?

## **Why Minor in Health Information Systems Management:**

Do you already have a major you love? Why not complement your major with an HISM minor? If you have an interest in the healthcare industry and would like to join the ongoing effort to improve healthcare through technology, then the Health Information Systems Management (HISM) minor is right for you.

The objective of the HISM minor is to teach pertinent, up-to-date health information systems knowledge to students who will take on responsibilities using information systems to manage medical practice and/or making clinical decisions to improve the quality and efficiency of healthcare delivery.

A HISM minor is a great way for you to enhance your major with technology skills and knowledge that makes you much more valuable in your chosen major field.

Apply today at the [IS department website](#).

Dr. Peter Haried  
Information Systems Department Chair
