

# Have You Considered Information Systems?

## Why Minor in Information Systems:

Do you already have a major you love? Why not complement your major with an IS minor? Can you think of a future career that will not use data analytics, technology or information systems in some way? Then why not enhance your major with in-demand technology skills and knowledge. An IS minor is a great way for you to enhance your major with technology skills and knowledge that makes you much more valuable in your chosen major field. Apply today at the IS department website.

UWL offers both an IS Major and Minor, which will prepare you with many of the in-demand technology skills recruiters are looking for. Currently, the IS department is offering courses in SAP a leading enterprise system, which is a popular application used by a majority of Fortune 500 firms. I encourage you to consider adding an Information Systems Minor or Major to your coursework to set you apart with the technology skills needed to position you for success.

Dr. Peter Haried  
Information Systems Department Chair
