

Medical Dosimetry Program 2025 Clinical Educator Award of Clinical Excellence

Students submit nominations for the Clinical Educator Award annually. As one of the largest programs in the nation with nearly 140 clinical internship sites and 341 clinical instructors, recipients of this award demonstrate qualifying characteristics of clinical instructors dedicated to the education of medical dosimetry students.

The characteristics that Katelyn Knoepke exhibits are found in her nomination:

KATELYN KNOEPKE, CMD

Mayo Clinic
Rochester MN

'In the field of medical dosimetry, precision and compassion go hand in hand – and Katelyn exemplifies both. Through her patience, kindness, and dedication to helping others succeed, she has fostered an environment where students not only learn but truly grow. Whether it's offering practical tips, simplifying complex concepts, or encouraging students through challenges, Katelyn goes above and beyond to support others' professional and personal development. Her willingness to share knowledge and uplift peers reflects the true spirit of growth – both in skill and in character.'

Medical Dosimetry Program 2025 Clinical Educator Award of Clinical Excellence

Students submit nominations for the Clinical Educator Award annually. As one of the largest programs in the nation with nearly 140 clinical internship sites and 341 clinical instructors, recipients of this award demonstrate qualifying characteristics of clinical instructors dedicated to the education of medical dosimetry students.

The characteristics that Lisa Warwick exhibits are found in her nomination:

LISA WARWICK, CMD

Medical University of
South Carolina
Charleston SC

'As a former UWL dosimetry graduate, experienced dosimetrist, and chief dosimetrist of our department, Lisa possesses a remarkable wealth of skills, knowledge, and experience. She was truly born with the gift of teaching. Lisa approaches every learning opportunity with patience and grace and has an incredible ability to explain complex concepts in a way that new dosimetrists, physics residents, and medical residents alike can easily understand.

What makes Lisa so deserving of this award is her exceptional ability to teach and lead which has been the most impactful part of my experience in the program. Despite her demanding role as chief dosimetrist, she is always willing to take time to teach, share her expertise, and answer questions. Lisa leads with grace, patience, and deep knowledge, and I will always be grateful for the influence she has had on both my career and my life.

Lisa embodies all the qualities of an outstanding dosimetrist, educator, and leader—qualities I aspire to emulate one day. I can think of no one more deserving of this award than Lisa.'
