ROOM DESCRIPTION

Circular room layout with 30' diameter dome that protrudes about 25' above floor.

REMARKS

- A. Good air circulation required.
- B. Circular room with 2 rows of semi-circular bench seating arrangement. ADA accessible.

ROOM DESCRIPTION

Covered locked rooftop observing area with roll-off roof.

REMARKS

- A. 3 piers connected to non-vibrating foundation.
- B. Red lighting placed low to ground. General full-cutoff lighting with on/off switch.
- C. Slide-off roof must protect telescopes/piers when in place, role off to provide view of sky during observing sessions. Rigid floor with isolation of telescope piers. High walls to block campus lights.

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																																						
Uncovered locked rooftop observing area with roll-off roof.																																																																																																																																																																																																																																																																																																																																						
REMARKS																																																																																																																																																																																																																																																																																																																																						
A.	3 piers connected to non-vibrating foundation.																																																																																																																																																																																																																																																																																																																																					
B.	Red lighting placed low to ground. General full-cutoff lighting with on/off switch.																																																																																																																																																																																																																																																																																																																																					
C.	Slide-off roof must protect telescopes/piers when in place, role off to provide view of sky during observing sessions. Rigid floor with isolation of telescope piers. High walls to block campus lights.
