GET STARTED.

It's Monday. It's time to start or continue creating your online course or courses. Have you...

- **Read the [Keep Teaching](#) site?**
Start here to get started on some strategies and options for this shift to online teaching.
- **Reviewed the [guiding principles for teaching online](#)?**
These principles will help focus your efforts and are appropriate for those new and experienced with online teaching.
- **Checked your [Canvas skills](#)?**
It's a good time to make sure you are aware of the options within Canvas and this is a good place to start.
- **Explored helpful [articles](#)?**
If you want to learn something specific, try searching for it in the UWL Knowledge Base. CATL and ITS are adding articles and taking requests if you believe one is missing.
- **Reminded yourself to be flexible in your teaching approach?**
This is new to us all. Go easy on yourself and take on a little at a time. We'll get there together.
- **Taken a deep breath?**
CATL is here to help!
