

Due by March 31, 2012

Notice: Pursuant to s. NR 216.07(8), Wis. Adm. Code, an owner or operator of a Municipal Separate Storm Sewer System (MS4) is required to submit an annual report to the Department of Natural Resources (DNR) by March 31 of each year to report on activities for the previous calendar year. This form is being provided by the DNR for the user's convenience. Personal information collected will be used for administrative purposes and may be provided to the extent required by Wisconsin's Open Records Law [ss. 19.31-19.39, Wis. Stats.].

This form is for reporting on activities undertaken in calendar year 2011.

Instructions: Complete each section of the form that follows. If additional space is needed to respond to a question, attach additional pages. Provide descriptions that explain the program actions taken to comply with the general permit. Complete and submit the annual report by March 31, 2012, to the appropriate address indicated on the last page of this form.

SECTION I. Municipal Information

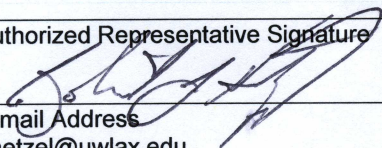

Name of Municipality University of Wisconsin - La Crosse		Facility ID No. (FIN) 37167	
Mailing Address 1725 State Street	City La Crosse	State WI	Postal Code 54601
County(s) in which Municipality is located La Crosse	Type of Municipality: (check one) <input type="checkbox"/> County <input type="checkbox"/> City <input type="checkbox"/> Village <input type="checkbox"/> Town <input checked="" type="checkbox"/> Other (specify) University of Wisconsin 4-year Institution		

SECTION II. Municipal Contact Information

Name of Municipal Contact Person Daniel J. Sweetman		Title Environmental Health, Occupational Safety & Sustainability Program Manager	
Mailing Address 1725 State Street	City La Crosse	State WI	Postal Code 54601
E-mail Address dsweetman@uwlax.edu	Telephone No. (include area code) (608)785-6800	Fax No. (include area code) (608)785-8059	

SECTION III. Certification

I hereby certify that I am an authorized representative of the municipality covered under MS4 General Permit No. WI-S050075-1 for which this annual report is being submitted and that the information contained in this document and all attachments were gathered and prepared under my direction or supervision. Based on my inquiry of the person or persons under my direction or supervision involved in the preparation of this document, to the best of my knowledge, the information is true, accurate, and complete. I further certify that the municipality's governing body or delegated representatives have reviewed or been apprised of the contents of this annual report. I understand that Wisconsin law provides severe penalties for submitting false information.

Authorized Representative Printed Name Robert J. Hetzel		Authorized Representative Title Vice-Chancellor, Administration and Finance	
Authorized Representative Signature 		Date Signed 03.25.12	
E-mail Address bhetzel@uwlax.edu	Telephone No. (include area code) (608)785-8021	Fax No. (include area code) (608)785-8035	

SECTION IV. General Information

a. Describe what efforts the municipality has undertaken to invite the municipal governing body, interest groups, and the general public to review and comment on the annual report.

The prior year annual report had been reviewed and approved by the campus governing body prior to submission. UW-L interest groups and the general public is given the opportunity to review and comment on the submitted annual reports through a campus web site dedicated to storm water management.

b. Describe how elected and municipal officials and appropriate staff have been kept apprised of the municipal storm water discharge permit and its requirements.

UW-L administration and appropriate staff have been kept apprised of the municipal storm water discharge permit and its requirements through formal meetings, e-mails and informal discussions.

c. Has the municipality prepared its own municipal-wide storm water management plan? Yes No

If yes, title and date of storm water management plan:
UW-La Crosse Storm Water Management Plan, May 2008

d. Has the municipality entered into a written agreement with another municipality or a contract with another entity to perform one or more of the conditions of the general permit as provided under Section 2.10 of the general permit? Yes No

If yes, describe these cooperative efforts:
Pursuant with WI Statutue 70.119 the UW-L is required to make reasonable payments to the City of La Crosse for various conditions of the general permit. These conditions include, but are not limited to sections 2.3.2, 2.3.3, 2.3.4, 2.3.5, 2.6.1, 2.6.2, 2.6.3, 2.6.4 and 2.7.2.

e. Does the municipality have an internet website? Yes No

If yes, provide web address:
The storm water management program web site is http://www.uwlax.edu/ehs/storm_water.htm. UW-L has also collaborated with other local MS4 permittes in creation of the La Crosse Waters website at <http://lacrossewaters.org/>.

If the municipality has an internet website, is there current information about or links provided to the MS4 general permit and/or the municipality's storm water management program? Yes No

If yes, provide web address:
Enter the UW-L storm water home page as described in section IV (e). The UW-L Storm Water Management Plan is available through the link titled Storm Water Management Program Plan. The MS4 general permit is available as Appendix D in the Campus Storm Water Management Plan.

SECTION V. Permit Conditions

a. Minimum Control Measures: For each of the permit conditions listed below, provide a description of the status of implementation of program elements, the status of meeting measurable goals, and compliance with permit schedule in section 3 of the MS4 general permit. Provide an evaluation of program compliance with the general permit, the appropriateness of identified best management practices, and progress towards achieving identified measurable goals. Be specific in describing the actions that have been taken during the reporting year to implement each permit condition and whether measurable goals have been met, including any data collected to document a measurable goal. Also, explain the reasons for any variations from the compliance schedule in the MS4 general permit.

- Public Education and Outreach

UW-La Crosse public education and outreach program (permit condition 2.1) was submitted to the WDNR in March 2009. The following items were included as measurable goals in the public education and outreach program and were completed during the 2011 permit year. UW-L continues to educate and provide outreach via published articles in weekly newsletter e-mailed to every employee and student. The communications inform personnel of pollution prevention initiatives they can personally implement and activities taken by UW-L. Campus communications encourage personnel to learn about UW-L's Stormwater Management Program through review of regularly updated web content at http://www.uwlax.edu/ehs/storm_water.htm. Several environmental health oriented committees, student organizations and instructors incorporate storm water management issues into courses, and other events, such as but not limited to annual Earth Day activities. UW-L has participated in quarterly intergovernmental storm water public education meetings with various city, village, township and other government units.

- Public Involvement and Participation

UW-La Crosse public involvement and participation program (permit condition 2.2) was submitted to the WDNR in March 2009. The following items were included as measurable goals in the public involvement and participation program and were completed during the 2011 permit year. Several environmental health oriented committees, student organizations and instructors incorporate stormwater management issues into their courses and other events. For instance, UW-L students pursuing an environmental studies minor must complete a significant service learning project to fulfill course requirements necessary to receive the minor. Some of these projects typically have a theme that impacts enhancement of UW-L stormwater management program. UW-L Environmental Health, Safety and Sustainability request input for its annual MS4 reports and Storm Water Management Plan on the campus website. Comments are also solicited through campus newsletters directed via e-mail to all faculty, staff and students. UW-L faculty, staff, students and the general public are invited to public presentations on all capital building projects requiring an environmental impact statement. Meeting notifications are published pursuant with regulatory requirements. UW-L faculty, staff, students and the general public are also invited to public presentations on campus master planning. Campus master planning provides the framework for sustainable development, which in part addresses enhancing stormwater management .

- Illicit Discharge Detection and Elimination

Pursuant with WI Statutue 70.119 the University is required to make reasonable payments to the City of La Crosse for illicit discharge detection and elimination services. In addition, UW-L enforces storm water protection code at Wisconsin Admininstrative Code UWS 18.06(1) which prohibits dumping and other prohibited discharges to storm water. No illicit discharges, spilling or dumping was reported or identified in reporting year 2011.

- Construction Site Pollutant Control

The WI Department of Administration - Division of State Facilities (DOA-DSF) controls all new and renovation construction projects that could impact storm water. DOA-DSF has developed Erosion Control Standards as part of their Master specifications for construction projects. This standard is available in the link titled "Erosion Control" at http://www.doa.state.wi.us/dsf/masterspec_view_new.asp?catid=33&locid=4. DOA-DSF enforces standards compliance at construction sites during the construction process. During 2011 a major new academic building (Centennial Hall) and a new residence hall (Eagle Hall) continued and completed construction at UW-L. In 2011 DOA-DSF monitored site pollutant control but did not report any deficiencies.

- Post-Construction Storm Water Management

The WI Department of Administration - Division of State Facilities (DOA-DSF) controls all new construction and significant renovation projects that could impact storm water. DOA-DSF has developed construction standards to meet post-construction storm water requirements. These Master Specification standards are available through the links titled "Earthwork" and "Exterior Improvements" at http://www.doa.state.wi.us/dsf/mastspec_new.asp?locid=4. Within these links are various documents that require construction requirements to prevent and control post construction pollutants. DOA-DSF enforces standards compliance at construction sites during the construction process. In 2011 DOA-DSF completed construction projects in a new academic building (Centennial Hall) and a new residence Hall (Eagle Hall). Both new facilities have numerous bioinfiltration basins adjacent to the facilities to collect and treat storm water from the roof of their respective facility.

- Pollution Prevention

UW-La Crosse pollution prevention program (permit condition 2.6) was submitted to the WDNR in September 2009. The following items were included as goals in the pollution prevention program and compliance activities continued during the 2011 permit year. The City of La Crosse completed routine street sweeping and cleaning of catch basins on city streets that bisect campus. UW-L completed cleaning of all campus owned catch basins within the campus boundary; the campus owned catch basins are located in parking lots, sidewalks and grassy areas. UW-L mulched in place grass clippings and leaves. Lawn fertilizers are applied by UW-L in accordance with a nutrient application schedule. Campus staff maintained certified pesticide applicator licenses and continued to implement and enhance our integrated pest management approach. UW-L continued to implement the campus spill prevention control and countermeasures (SPCC) plan. UW-L continued to properly manage all solid, hazardous, universal and special wastes in accordance with State and Federal regulations. UW-L and parking lot contracted plowing services continued to apply the minimal level of deicers and slip prevention agents to assure safety. UW-L continued to wash fleet and maintenance vehicles inside campus or private pay for use facilities appropriate for this task. UW-L continued to maintain a State contract to provide emergency response services for hazardous material spill response services.

b. Storm Water Quality Management: Has the municipality completed a pollutant-loading analysis to assess compliance with the 20% TSS reduction developed urban area performance standard? Yes No

If yes, provide the following: Model used WinSLAMM Version 9.4.0 Reduction (%) 20.5

If no, include a description of any actions the municipality has undertaken during 2011 to help achieve the 20% standard.

Has the municipality completed an evaluation of all municipal owned or operated structural flood control facilities to determine the feasibility of retrofitting to increase TSS removal? Yes No If yes, describe:

The University of Wisconsin - La Crosse does not have structural flood control facilities.

c. Best Management Practices Maintenance: Does the municipality have a maintenance program for installed storm water best management practices? Yes No

If yes, describe the maintenance program. If available, attach any additional information on the maintenance program.

UW-L does not have a stand-alone maintenance program for installed storm water best management practices. Maintenance of storm water systems is integrated into the automated preventive maintenance (PM) program. This integration into UW-L's existing PM program assures regular inspection and servicing of bioinfiltration basins, roof drains and other fixed system components. Regular and frequent site-inspections evaluate and correct permeable portions of the campus landscape to assure optimal storm water infiltration and reduce runoff.

d. Storm Sewer System Map: Describe any changes or updates to the storm sewer system map made in the reporting year. Provide an updated map if any changes occurred during the reporting year.

Minor changes occurred in association with construction of Centennial Hall and Eagle Hall. Construction of these new facilities resulted in installation of bioinfiltration basins in basins 8.2, 8.3 and 17.2. These basins are identified on the attached figures 2A and 2B from an AECOM Urban Stormwater Pollution Loading Analysis received by UW-L in September 2011. These figures also include additional campus owned catch basins not previously identified on the initial WinSLAMM compiled in July 2010.

SECTION VI. Fiscal Analysis

- a. Provide a fiscal analysis that includes the annual expenditures for 2011, and the budget for 2011 and 2012. A table to document fiscal information is provided on page 6.
- b. What financing/fiscal strategy has the municipality implemented to finance the requirements of the general permit?
 Storm water utility General fund Other State (GPR) and UW-L (PR) Funds
- c. Are adequate revenues being generated to implement your storm water management program to meet the permit requirements? Yes No

Please provide a brief summary of your financing/fiscal strategy and any additional information that will assist the Department in understanding how storm water management funds are being generated to implement and administer your storm water management program.

The University of Wisconsin System does not have the authority, nor ability, to establish a storm water utility entity, or an equivalent revenue generating entity, for funding of the required storm water management program activities. All funding for the University of Wisconsin La Crosse storm water management activities relies on the State of Wisconsin's biennial capital budget and operational budget appropriations as well as internal charges to self sustaining/funded (PR: Program Revenue) entities.

SECTION VII. Inspections and Enforcement Actions

Note: If an ordinance listed below has previously been submitted and has not been amended since that time, a copy does not need to be submitted again. If the ordinance was previously submitted, indicate such in the space provided.

- a. As of the date of this annual report, has the municipality adopted a construction site pollutant control ordinance in accordance with subsection 2.4.1 of the general permit? Yes No If yes, attach copy or provide web link to ordinance:

The University does not have the authority to develop ordinances. In lieu of an ordinance the Department of Administration/ Division of State Facilities has developed Erosion Control Master Specifications available at http://www.doa.state.wi.us/dsf/masterspec_view_new.asp?catid=33&locid=4.

- b. As of the date of this annual report, has the municipality adopted a post-construction storm water management ordinance in accordance with subsection 2.5.1 of the general permit? Yes No If yes, attach copy or provide web link to ordinance:

The University does not have the authority to develop ordinances. In lieu of an ordinance the Department of Administration/ Division of State Facilities has developed Civil and Sitework Guideline Master Specifications available at ftp://doafp04.doa.state.wi.us/master_spec/Earthwork/cvIGUIDEs.DOC.

- c. As of the date of this annual report, has the municipality adopted an illicit discharge detection and elimination ordinance in accordance with subsection 2.3.1 of the general permit? Yes No If yes, attach copy or provide web link to ordinance:

The University utilizes State of Wisconsin Administrative Code, University of Wisconsin System, Chapter 18: Conduct on University Lands available at <http://www.legis.state.wi.us/rsb/code/uws/uws018.pdf>.

- d. As of the date of this annual report, has the municipality adopted any other ordinances it has deemed necessary to implement a program under the general permit (e.g., pet waste ordinance, leaf management/yard waste ordinance, parking restrictions for street cleaning, etc.)? Yes No If yes, attach copy or provide web link to ordinance:

- e. Provide a summary of available information on the number and nature of inspections and enforcement actions conducted during the reporting period to ensure compliance with the ordinances described in a. to d. above.

**Annual Report under MS4
General Permit No. WI-S050075-1**

Form 3400-195 (R 01/12) Page 7 of 11

The Department of Administration/Division of State Facilities (DOA/DSF) manages all construction site pollutant control operations throughout the report period to the standards required in the DOA/DSF Master Specifications. Specification requirements are communicated to contractors and enforced by DOA/DSF throughout the construction period. DOA/DSF regularly communicates Master Specification requirement enforcement issues to contractors in regularly scheduled progress meetings throughout construction and post construction. The applicable construction projects during this reporting period involved construction of a new academic building (Centennial Hall) and a new residence hall (Eagle Hall). Both facilities were operationally turned over to the UW-La Crosse in August 2011.

During the reporting period no illicit discharge events were identified by or reported to campus emergency response personnel in University Police or Environmental Health and Safety.

SECTION VIII. Water Quality Concerns

a. Does any part of the MS4 discharge to an outstanding resource water (ORW) or exceptional resource water (ERW) listed under s. NR 102.10 or 102.11, Wis. Adm. Code? (A list of ORWs and ERWs may be found on the Department's Internet site at: <http://dnr.wi.gov/org/water/wm/wqs/orwerw/>) Yes No If yes, list:

b. Does any part of the MS4 discharge to an impaired waterbody listed in accordance with section 303(d)(1) of the federal Clean Water Act, 33 USC § 1313(d)(1)(C)? (A list of the most current Wisconsin impaired waterbodies may be found on the Department's Internet site at: <http://dnr.wi.gov/org/water/wm/wqs/303d/303d.html>) Yes No If yes, complete the following:

- Impaired waterbody to which the MS4 discharges:

Black River

- Description of actions municipality has taken to comply with section 1.5.2 of the MS4 general permit for discharges of pollutant(s) of concern to an impaired waterbody:

The Black River is impaired due to contamination with polychlorinated biphenyl's (PCB's) and mercury. The University of Wisconsin - La Crosse has eliminated all known PCB's used for educational or other operational purposes. With limited exception, light ballasts are occasionally identified that contain PCB's. Major lighting projects have eliminated the vast majority of PCB containing ballasts. Waste PCB containing ballasts are collected and managed in accordance with federal and state regulations. PCB containing ballasts are shipped for disposal through the hazardous/toxic waste disposal contract administered by the State of Wisconsin, Department of Administration. During the past several years UW-L has taken great strides to significantly reduce the amount of mercury in facilities operations and laboratories. Mercury switches have been eliminated from facility operations. The only significant use of mercury within facility operations is fluorescent lamps and other high intensity lamps. All mercury containing lamps are recycled in compliance with Federal and State regulations. Over the past several years mercury containing thermometers and other laboratory equipment containing mercury have been substituted with non-mercury substitutes. For practical purposes, mercury containing laboratory equipment has been eliminated with the exception of a few pieces of equipment. All mercury generated from this facility operations and laboratory-based mercury elimination program has been collected and was managed through the hazardous/toxic waste disposal contract administered by the State of Wisconsin, Department of Administration.

c. Identify any known water quality improvements in the receiving water to which the MS4 discharges during the reporting period.

No water quality improvements known for receiving waters during reporting period.

d. Identify any known water quality degradation in the receiving water to which the MS4 discharges during the reporting period and what actions are being taken to improve the water quality in the receiving water.

No water quality degradation known for receiving waters during reporting period.

SECTION IX. Proposed Program Changes

a. Describe any proposed changes to the storm water management program being contemplated by the municipality for 2012 and the schedule for implementing those changes. Proposed program changes must be consistent with the requirements of the general permit.

If approved by appropriate State processes the WI DOA/Division of State Facilities will begin construction of a new parking ramp and University Police office building at the University of Wisconsin-La Crosse in May 2012. This project will include removal of a few existing catch basins and installation of bioinfiltration system(s). The net change will result in an improvement in storm water quality. The project will not be completed until 2013.

Fiscal Analysis Table. Complete the fiscal analysis table provided below.

Program Element	Annual Expenditure		Budget		Source of Funds
	2011	2011	2012		
Public Education and Outreach	280	300	300		State of Wisconsin: General Program Revenue
Public Involvement and Participation	280	600	300		State of Wisconsin: General Program Revenue
Illicit Discharge Detection and Elimination					Illicit Discharge Detection and Elimination services are primarily completed and funded by the City of La Crosse.
Construction Site Pollutant Control					Construction Site Pollutant Control is funded through WI DOA/DSF building project funds.
Post-Construction Storm Water Management	240	300	0		State of Wisconsin: General Program Revenue University of Wisconsin - La Crosse: Program Revenue
Pollution Prevention	33,761	29,000	27,500		State of Wisconsin: General Program Revenue University of Wisconsin - La Crosse: Program Revenue
Storm Water Quality Management (including pollutant-loading analysis)	4,800	7,900	0		State of Wisconsin: General Program Revenue
Storm Sewer System Map	0	150	0		State of Wisconsin: General Program Revenue
Other	840	1,100	51,000		State of Wisconsin: General Program Revenue University of Wisconsin - La Crosse: Program Revenue
