New Year, New NIH Guidelines

With the new year, NIH has announced some new guidelines that will impact UWL’s most commonly targeted grant program, the Academic Research Enhancement Award (AREA) (R15). As of January 7, 2019, the AREA parent announcement (PA-18-504) will expire and be replaced by the AREA for Undergraduate-Focused Institutions solicitation (PAR-18-714) (full notice: NOT-OD-19-015). Only predominantly undergraduate institutions, like UWL, are eligible for the revamped program. Most application requirements remain the same, with the exception of a new requirement for a letter certifying institutional eligibility; ORSP has a letter template. See the ORSP website for an updated NIH proposal development checklist and the NIH website for an R15 program overview.

As part of the R15 revisions, NIH has introduced a new Research Enhancement Award Program (REAP), which is open only to health professional schools and graduate schools of arts and sciences. The REAP solicitation is now available.

Additionally, NIH has made updates to the application guidelines, which impact all applications. The new guidelines are effective for applications due on or after January 25, 2019 (NIH summary of changes). A few notable updates include the following:

- Research Strategy:
  - Under the “Significance” section, the former instructions for describing a project’s “scientific premise” have been replaced with the following: “Describe the strengths and weaknesses in the rigor of the prior research (both published and unpublished) that serves as the key support for the proposed project.”
  - Under the “Approach” section, the following instructions have been added: “Describe plans to address weaknesses in the rigor of the prior research that serves as the key support for the proposed project.”
Implementation of the updated inclusion policy, NIH Policy and Guidelines on the Inclusion of Individuals Across the Lifespan as Participants in Research Involving Human Subjects (NOT-OD-18-116): Applications for research involving human subjects must address the age-appropriate inclusion or exclusion of individuals in the proposed research, including a description of plans for including individuals across the lifespan, and a rationale for selecting a specific age range justified in the context of the scientific question(s) posed. The revised criteria for “Inclusion Across the Lifespan” replaces the former “Inclusion of Children” criteria.

The language of review criteria used to score proposals has been revised to align with the above changes.

NSF Expands STEM Education Opportunities, Following New National Strategic Plan

The National Science Foundation (NSF) unveiled several new programs to break down barriers to entering scientific fields, tied to the release of a new White House strategy for STEM education. The administration released Charting a Course for Success: A Federal Strategy for STEM Education, which lays out plans to further STEM education by working with state and local stakeholders, the education community and American employers. To support these goals, NSF has committed millions of dollars to three education focused programs.

Faculty Research Day and the Celebration of Student Research and Creativity Join Forces
A new year means a new way to celebrate research and creativity on the UW-La Crosse campus! This spring, the Faculty Research Day and the Celebration of Student Research and Creativity are joining forces to bring a full day dedicated to showcasing the hard work the UWL community has been engaging in over the past year during the Research and Creativity Symposium (ReCS).

UWL researchers (students, faculty, and staff) have the opportunity to present their work through oral presentations, poster displays, gallery exhibits, and artistic performances. The event highlights research and creativity accomplishments of the campus community and the important role faculty and academic staff play as mentors in the scholarly activity process. ReCS encourages dissemination of scholarly work results from all disciplines represented in the UWL academic community.

Save the Dates for Grant Seeking Professional Development Webinars!

For the 2018-19 academic year, WiSys will again be hosting a grant training & professional development webinar series for UW System faculty and staff. Topics will span the continuum of grant seeking expertise, addressing the needs of novice as well as seasoned grant applicants. See below for the dates and topics.

*New this year:* Faculty and staff should register themselves directly at 17/20
wisys.org/grants/webinars to participate in sessions of interest. After registration, you will be able to access the webinar from your own device from any location.

2018-19 GRANT WEBINAR SCHEDULE:

1. OCTOBER 11, 2018
   2:00-2:45PM
   Funding Opportunities for Your Teaching, Research & Scholarship

2. NOVEMBER 8, 2018
   2:00-2:45PM
   The Sustainability Challenge: Designing Projects for Success Beyond the Grant Period

3. DECEMBER 13, 2018
   2:00-2:45PM
   Preproposal Contacts: Who You Need to Talk to & What You Need to Know Before Writing Your Next Grant Proposal

4. FEBRUARY 14, 2019
   2:00-2:45PM
   Common Grant Writing Pitfalls - and How to Avoid Them

5. MARCH 7, 2019
   2:00-2:45PM
   Building a Believable Budget

6. APRIL 11, 2019
   2:00-2:45PM
   Collaborative Grantseeking: Accumulating Precious “Wins” & Avoiding Painful “Losses”

Join WiSys Regional Research Administrator Jeremy Miner in exploring various aspects of successful grant writing through a live webinar series.
