Information For

Becoming a Peer Reviewer

The NIH peer review system is the foundation of the NIH extramural research enterprise, and its continued excellence depends on our ability to recruit and retain the most accomplished, broad-thinking and creative scientists and experts to serve as peer reviewers. Such qualified individuals are needed to serve on Scientific Review Groups (or “study sections”) in the initial peer review of applications and evaluation of R&D contract proposals.

Individuals who possess expertise in areas supported by the NIH and who wish to volunteer to serve in the NIH peer review process should send an email to the Enhancing Peer Review mailbox (ReviewerVolunteer@mail.nih.gov) with a brief description of their areas of expertise in the body of the email (1-2 sentences) and a copy of their biosketch as an attachment.

Principal Investigators (PIs) who receive research grant support from the NIH are an enriched source of such highly-qualified individuals. Therefore, the NIH calls upon investigators who have received research grant funding from the NIH to serve on NIH study sections and advisory groups when invited to do so. However, this expectation for service is entirely voluntary and an inability to serve has no impact on an investigator’s ability to compete for grant support.

NATIONAL ENDOWMENT FOR THE HUMANITIES

Panelist Sign-up Form

We are always looking for scholars, cultural institution leaders, humanities center staff, and other experts to serve as peer reviewers. If you have ever applied for an NEH grant or served on an NEH panel, you are already in the NEH electronic grants management system (eGMS) and do not need to register via this form. But if you are new to the NEH, and if you would like to be considered as a peer reviewer, use this form to add yourself to the system. The NEH may use the information you provide to consider your candidacy for service on a peer review panel, and may also use that information to contact you to request your participation on a peer review panel. If you have been encouraged to sign up by a member of the NEH staff or the National Council on the Humanities, or by an NEH grantee or panelist, let us know in your comments below.

Boldface fields are required. On the next screen you can upload your CV or résumé as a PDF file.

To learn more about the application review process, check out this page on the NEH website: <https://www.neh.gov/grants/application-process>. Also on the website, the agency privacy policy: <https://www.neh.gov/privacy>.

Volunteer for Review Panels

Welcome to the volunteer reviewer page!

To increase the pool of un-conflicted reviewers we are seeking subject matter experts to serve as on-line reviewers of proposals and/or in-person reviewers to engage in discussions at a face-to-face panel meeting. New researchers including post doctoral fellows and sometimes upper level graduate students are welcome. Just follow the links below to the volunteer review forms and indicate the fields in which you consider yourself to be a subject matter expert and click the boxes. If your expertise matches our program needs NASA will contact you to discuss potential review assignments. Qualified SMEs may, and are encouraged, to volunteer to one or more program reviewer

Why You Should Volunteer to Serve As An NSF Reviewer

Reviewers are Essential - NSF needs YOU

The success of the peer review process, which enables NSF to make wise investments in all fields of science and engineering research and education, depends on the willingness of qualified reviewers like you to share your time and expertise. Your experience and up-to-date knowledge enables you to provide helpful advice to NSF program officers on the merits of proposals and constructive comments to proposers that strengthen their projects. In making its decisions on proposals, the counsel of these merit reviewers has proven invaluable to the Foundation in the identification of meritorious projects. The Foundation also may ask reviewers to serve on panels, for which NSF pays travel expenses.

To implement peer review, NSF depends upon the reviewer community for nearly 240,000 reviews per year. We try to limit the number of requests made to any single individual, recognizing the many demands our reviewers have on their time. Therefore, NSF strives to increase both the size and diversity of the pool of reviewers to ensure that the NSF merit review process benefits by receiving broad input from a variety of different perspectives. You can help by volunteering to review proposals in your area of expertise.

Benefits to You as a Reviewer

In addition to providing a great service to NSF and the science and engineering community, reviewers benefit from reviewing and serving on panels. For example, reviewers gain first hand knowledge of the peer review process; learn about common problems with proposals; discover strategies to write strong proposals; and, through serving on a panel, meet colleagues and NSF program officers managing programs related to your interests.

How to Become a Reviewer

To become an NSF reviewer, send an e-mail to the NSF program officer(s) of the program(s) that fits your expertise. Introduce yourself and identify your areas of expertise, and let them know that you are interested in becoming a peer reviewer. It is most helpful if you also attach a 2-page CV with current contact information. We also encourage you to share this request with other colleagues who might be interested in serving as NSF reviewers. NSF welcomes qualified reviewers from the academic, industrial, and government sectors.

NATIONAL INSTITUTE OF JUSTICE

nij.ojp.gov/funding/becoming-peer-reviewer-nij

Becoming a Peer Reviewer for NIJ

NIJ draws reviewers for both its ad hoc and standing review panels from diverse backgrounds and regions who have relevant expertise and experience in at least one of the following areas:

- Crime control and prevention research.
- Criminology, law enforcement or corrections.
- DNA analysis, research and development.
- Information and sensor technologies.
- Investigative and forensic science and technology.
- Justice systems research.
- Law enforcement technologies.
- Violence and victimization research.

Ad Hoc Review Panels

Some ad hoc reviews are conducted remotely, whereas others involve in-person meetings. Reviewers score 10 to 15 applications within a two-to-four-week period. Before beginning their work, reviewers must participate in an orientation telephone call, which covers the role and responsibilities of the reviewers and the background and purpose of the grant program under review.

Ad hoc reviewers receive \$125 for each application reviewed.

How to Become a Grant Reviewer

If you have expertise in certain subjects, you may be able to evaluate grant applications.

How do we choose reviewers?

We choose reviewers based on their knowledge, education, and experience. We also select them based on specific criteria in the HRSA Notice of Funding Opportunity (NOFO).

How can you apply to become a grant reviewer?

If you work, or have experience, in health care, register via our [Reviewer Recruitment Module \(RRM\)](#).

We look for people with expertise in one of the following areas:

- Health workforce training
- HIV/AIDS
- Maternal and child health
- Organ transplantation
- Primary care for underserved people

How We Work

Panelist Information

NIFA convenes peer review panels comprised of research scientists and other subject matter experts to review competitive grant proposals.

Panels may be conducted via teleconference, at off-site hotels, or on-site at the NIFA building in Washington, DC. Peer review panels may take anywhere from a few hours to a week to complete. Panelists are asked to read proposals and prepare written reviews prior to the panel meeting.

BECOMING A PANELIST

Those interested in serving on a peer-review panel may contact the National Program Leader listed in the Request for Application (RFA).

Volunteer to be a National Endowment for the Arts Panelist

Arts Endowment panelists play a central role in reviewing applications for funding. We rely on panels composed of individuals who represent a broad range of artistic and cultural viewpoints, as well as wide geographic and ethnic diversity, to provide advice about the artistic excellence and artistic merit of proposals in a variety of funding categories. Our panels are composed of both arts professionals and knowledgeable laypersons. Most panelists are arts professionals who are qualified by their activities, training, skills, and/or experience in one or more art forms. Every panel also includes a layperson – someone knowledgeable about the arts but not engaged in the arts as a profession either full- or part-time.

We maintain a database to help us identify and select panelists. The NEA does not share this information with any third parties. Responding to some of the questions is voluntary and the information is used only for statistical and diversity inclusion purposes. However, inclusion in this database does not guarantee that someone will be asked to serve on a panel.

Arts Board > Become a Wisconsin Arts Board Panelist

Become a Wisconsin Arts Board Panelist

Each year, the Wisconsin Arts Board relies on the services of many volunteer panelists, who review grant applications, make recommendations, and select artwork for purchase or commission at state sites.

Panels bring together artists, arts professionals, educators, community members, and others actively involved in the arts. Their participation is solicited by Arts Board staff on a panel-by-panel basis. Arts Board rules allow reappointment to the same panel for two consecutive panels. Panelists are reimbursed for travel, meal and lodging expenses, but are not compensated for their time or services. The Arts Board actively solicits and accepts nominations for panelists from constituents and private citizens in an open nominations process. All panel meetings are open to the public.

Panelist Profile

Prospective panelists should be at least 18 years of age and possess experience in one or more of the following areas:

- An artistic discipline
- Arts education

artwork for purchase or commission at state sites.

Panels bring together artists, arts professionals, educators, community members, and others actively involved in the arts. The Arts Board actively solicits and accepts nominations for panelists from constituents and private citizens in an open nominations process. All panel meetings are open to the public.

Panelist Profile

Prospective panelists should be at least 18 years of age and possess experience in one or more of the following areas:

- An artistic discipline
- Arts education
- Financial or organizational management for nonprofit organizations
- Public art aesthetics
- Community-based arts projects

The Wisconsin Arts Board seeks panelists with strong knowledge and professional qualifications in the arts, familiarity with Wisconsin's arts communities and the ability to work well in a group. In addition, the Arts Board looks for panelists who are willing to commit time and energy to the review process and who will exhibit sensitivity in making constructive critical comments on grant applications. To help reflect the diversity of the state on all panels, the Arts Board considers gender, geographic representation and cultural background in selecting panelists. The agency also seeks balance among the professional groups encompassed by the arts, such as practitioners, administrators and educators.

OPE Field Reader Registration

The U.S. Department of Education, Office of Postsecondary Education (OPE) is seeking peer reviewers (field readers) to read and evaluate discretionary grant program applications. If you are interested in serving as a field reader for OPE grant competitions **you must register in G5 at <https://www.g5.gov/>.**

Register as a Field Reader

The **Web-based application form is available at <https://www.g5.gov/>**. First-time users may register in G5 and those already registered may update their profile information. On this site, potential readers provide OPE with information about their educational background and expertise, their technology skills, their grant reading history, and program experience. Applying to be a field reader through this site is the first step in the selection process. Interested persons must be deemed qualified for a particular reading, indicate their availability for a reading, and be selected before they actually become a reader.

Field readers will receive a flat fee honorarium and a stipend for supplies (paper and ink) for the entire review period based on the established number of reading days and applications. Since the number of reading days and applications to be reviewed may vary, you will be informed of the amount of the honorarium at the time of your selection as a field reader.

Contact the help desk listed on the Web site if you need help registering with or logging into the G5 system.

Project Number: 1R15GM129674-01
Title: DEVELOPMENT OF PLATFORM FOR PASSIVE CELL SELECTION BASED ON METABOLISM
Contact PI / Project Leader: [ABBYAD, PAUL](#)
Awardee Organization: SANTA CLARA UNIVERS

Abstract Text:

SUMMARY The objective of this proposal is to develop a label-free device that can sort single cells based on metabolism. Glycolysis plays a fundamental activation, proliferation and disease progression. Shifts in metabolism from oxidative phosphorylation to glycolysis have been linked to such processes ; and the reprogramming and proliferation of stem cells. Many disease states, including diabetes, cancer, obesity and metabolic disorders involve altered g techniques are limited to the measurement of glycolysis via fluorescence assays or extracellular acidification. The isolation of live single cells based on the analysis (genomics, proteomics, metabolomics, etc.), culture and targeting of aberrant cells. Our device will allow the high-throughput sorting of live activity in a microfluidic device without the use of any labels, markers or active sorting components. In the first aim, the technique will be used to separa accuracy and high-throughput. This platform can serve as a free-standing, inexpensive technology to quickly and easily separate live and dead cells for pharmacology and toxicology. In the second aim of the proposal, the device will be used to isolate cells with high glycolytic activity that will be analyzed transcriptome analysis and compared to the larger population of cultured cells. This analysis will reveal the cell-to-cell heterogeneity in gene expression determinants of highly glycolytic cells. Single- cell gene expression may also reveal contributors to glycolytic activity that may be masked in bulk studies technology can find broad use for the isolation of rare cells or subpopulations with high rates of metabolism for applications in medicine, cell biology, bio

NSF Program(s):	Linguistics
Program Reference Code(s):	1311, 9179, SMET
Program Element Code(s):	1311

ABSTRACT

Most work on language acquisition examines acquisition of language in stable and relatively homogeneous environments. In these environments typically developing children become competent speakers of the language they are exposed to quickly and efficiently. This project examines children's acquisition of grammatical properties in a much less stable but very common situation, that of language and dialect contact. Mutually intelligible dialects sometimes use the same morphological units in different ways and with different interpretations. This creates a lot of variability in the linguistic input for the learner, who then faces a linguistic situation that may provide evidence for two different and possibly incompatible grammars. Yet such children do develop their linguistic abilities and the capacity to produce and understand sentences they never heard before. Contact environments, therefore, provide a window for the researcher to examine how the learning mechanisms decide which properties of the input are "good evidence" and which are not. These environments can therefore shed light on how the learning mechanisms cope with contradictory or ambiguous input.

Here you will find brief descriptions of public humanities projects that received grants from the WHC in 2018.

We couldn't fund these projects without support from the National Endowment of the Humanities. **The NEH provides 90% of the funding that enables us to bring great programming, support and services to the state of Wisconsin.** Project sponsors match grants in their community with an average of \$3 for every \$1 we award.

Zoom down the page to read about Major Grants funded in 2018.

Mini Grant Awards awarded in 2018

Voting for a Change – The Impact of the 19th Amendment on Our Community | \$2,000 to *Neenah Historical Society*

WHC funds will help the Neenah Historical Society create an exhibit and supporting programming to celebrate the passage of the 19th Amendment to the U.S. Constitution. The exhibit will highlight the struggle, the process and the outcome of this monumental moment in our history and how the community and the lives of women have changed since then.

Eighth Annual Tony Woiak History Festival | \$2,000 to *Washburn Heritage Association*

As co-sponsors, the Washburn Heritage Association and the Washburn Area Historical Society again present a series of four history lectures featuring regional topics presented by local experts.

Of Time and Place: The River Bend Trail | \$1,628 to *T.B. Scott Free Library* in Merrill

This project will help Merrill explore its changing cultural identity as it faces demographic and social change. The project

- Grants Resource Center (check with your ORSP)
- Federal? FOIA
- Google

Teamwork as a project strategy

- ✓ An ESI strategy
- ✓ Fill an expertise gap
- ✓ Interdisciplinary
- ✓ Outside the box approaches
- ✓ Maximize the reach/ impact of funding
- ✓ Sponsor requirement
- ✓ Feedback loop

Refine and share ideas (concept paper)

- ✓ Project mapping
- ✓ Feedback loop
- ✓ Collaborator recruitment tool
- ✓ Sponsor reach out
- ✓ Writing activity

Concept paper outline

- 1. Project title (in the form of a research question)**
- 2. Need/Purpose/Rationale**
 - a) What others have written on the topic**
 - b) Identify the gap in knowledge to be filled**
 - c) An explanation of why it is important to pursue and fill the gap, establish significance**
- 3. Project Description**
 - a) Identify the investigation that will fill the knowledge gap, emphasizing its innovative/novel features, potential for being transformative**
 - b) Include a description of overall goal(s), objectives, and a concise overview of methods, and a discussion of how the methods/data will answer the research question**
- 4. How will the project advance knowledge/know-how in the field?**
- 5. What are the benefits to be realized, beyond the project outcomes?**

NATIONAL ENDOWMENT FOR THE HUMANITIES

II. Preparing and Organizing your Application

Resources for preparing a strong application

To prepare a strong application, applicants are encouraged to take the following steps:

- read this notice of funding opportunity carefully, noting what information needs to be provided in the application
- consult the program's **review criteria**, which are listed immediately below
- review the instructions for the **narrative** (under Attachment 3 below)
- read the **Frequently Asked Questions**, which are available on the [program resource page](#);
- review the materials (including the **sample narratives** and **budgets**) available on the [program resource page](#);
- contact the **program staff** (at 202-606-8337 or humanitiesconnections@neh.gov) to discuss your project and raise any questions you may have about the application; and
- submit an optional **draft proposal** by **August 19**, to which program staff will respond with suggestions and advice.

Although staff comments and responses to draft proposals are not part of the formal review process and have no bearing on the final outcome of the proposal, previous applicants have found them helpful in strengthening their applications.

Proposal deadline: September 19

WISCONSIN HUMANITIES COUNCIL

We are here to help!

Whether you are new to grant writing or not, if this is your first application to the WHC or your 10th, we recommend you contact us! Our Grant Program Director, Meg Turville-Heitz, is ready to brainstorm an idea, clarify guidelines, or connect you with a humanities expert. She is also happy to read drafts, but please allow a month before the application deadline for review.

NOTE: If you have any **questions** or if your plans include producing a **video, audio or digital humanities** product, please call us at (608) 265-5595 or email Meg Turville-Heitz for additional information and the special application form for digital projects.

More than half of all grant applicants receive funding

63% of applications for Mini Grants were awarded between 2013-2019

55% of applications for Major Grants were awarded between 2013-2019

Plan for your writing goals

- Work backward from the deadline
- Consider institution's internal processes
- Identify strategies for reclaiming writing time
- Feedback loop
- Build in time for the unexpected
- Need structured accountability?

Presentation takeaways

Networking: Building relationships

- Campus community**
 - Within home department, college/school
 - Other colleges/schools, departments
 - Other university divisions
- State and region**
 - Other public/private IHEs
 - State/local government
 - Industry/Non-profit sector
 - School districts
- Professional field**
 - Conferences
 - Journals
 - Associations
 - Social media
- Funding sponsors**

WiSys

Reviewers are always needed!

WiSys

Review prior awards, awarded proposals

- Source options**
- Awards information**
- NIH RePORTER
 - NSF Awards
 - USDA CRIS, Data Gateway
 - Energy: PAMS
 - NEH
 - USDE
 - Non-federal: web sites and annual reports, tax form 990s
- Copies of proposals**
- within the institution
 - within the UW system
 - at your alma mater/mentor
 - cold outreach
 - Grants Resource Center (check with your ORSP)
 - Federal? FOIA
 - Google
