REMARKS																																																																																																																																																																																																																																																																																																																														

# Appendix A: Room Data Sheets

Room ID No.: 8D  
 Room Name: Lecturer – Part Time  
 Unit: Physics Department

Occupancy: 2  
 Room Size: 120 ASF

### UTILIZATION

Hours of Use  
 8 hours/day \_\_\_\_\_  
 14 hours/day \_\_\_\_\_  
 24 hours/day \_\_\_\_\_

### MECHANICAL

Temperature  
 68°-75° ± 2°F \_\_\_\_\_  
 Other \_\_\_\_\_  
 Humidity  
 Uncontrolled \_\_\_\_\_  
 Other \_\_\_\_\_  
 Minimum Air Changes/Hr. \_\_\_\_\_  
 Air Recirculation \_\_\_\_\_  
 Air Pressure Positive \_\_\_\_\_  
 Air Pressure Negative \_\_\_\_\_  
 Additional Supply Air Filtration \_\_\_\_\_  
 Additional Exhaust Air Filtration \_\_\_\_\_

### HOODS

Chemical Fume Hood \_\_\_\_\_  
 Radioisotope Hood \_\_\_\_\_  
 Horizontal Laminar Flow Hood \_\_\_\_\_  
 Biological Safety Cabinet \_\_\_\_\_  
 Snorkel \_\_\_\_\_  
 Canopy Hood \_\_\_\_\_  
 Low Slotted Exhaust \_\_\_\_\_  
 Equipment Exhaust \_\_\_\_\_  
 Other \_\_\_\_\_

### LABORATORY EQUIPMENT

Vibration Sensitive \_\_\_\_\_  
 Light Sensitive \_\_\_\_\_  
 Vibration Producing \_\_\_\_\_  
 Heat Producing \_\_\_\_\_  
 Noise Producing \_\_\_\_\_

### PLUMBING

Laboratory Gas (LG) \_\_\_\_\_  
 Laboratory Vacuum (LV) \_\_\_\_\_  
 Laboratory Air (LV) \_\_\_\_\_  
 Compressed Air, 100 psi (A) \_\_\_\_\_  
 Industrial Hot Water (IHW) \_\_\_\_\_  
 Industrial Cold Water (ICW) \_\_\_\_\_  
 Potable Hot Water (HW) \_\_\_\_\_  
 Potable Cold Water (CW) \_\_\_\_\_  
 Purified Water (PW) \_\_\_\_\_  
 Chilled Water (CHW S/R) \_\_\_\_\_  
 Steam \_\_\_\_\_  
 Condensate Return \_\_\_\_\_  
 Carbon Dioxide (CO<sub>2</sub>) \_\_\_\_\_  
 Nitrogen Gas (N<sub>2</sub>) \_\_\_\_\_  
 Cylinder Gases \_\_\_\_\_  
     Inert \_\_\_\_\_  
     Flammable \_\_\_\_\_  
     Toxic \_\_\_\_\_  
 Floor Drain (FD) \_\_\_\_\_  
 Floor Sink (FS) \_\_\_\_\_  
 Safety Shower/Eyewash (SS) \_\_\_\_\_  
 Drench Hose (DH) \_\_\_\_\_

### ELECTRICAL

110V, 20A, 1 Phase \_\_\_\_\_  
 208V, 30A, 1 Phase \_\_\_\_\_  
 208V, 30A, 3 Phase \_\_\_\_\_  
 480V, 100A, 3 Phase \_\_\_\_\_  
 Isolated Ground Outlet \_\_\_\_\_  
 Emergency Power \_\_\_\_\_  
 UPS (OFOI) \_\_\_\_\_  
 Phone ● \_\_\_\_\_  
 Data ● \_\_\_\_\_  
 In Use Light \_\_\_\_\_  
 Task Lighting ● \_\_\_\_\_  
 Lighting Level  
     100 fc at bench/desk \_\_\_\_\_  
     75 fc at bench/desk \_\_\_\_\_  
 Safe Light \_\_\_\_\_  
 Special Lighting \_\_\_\_\_  
 Darkenable \_\_\_\_\_  
 Zoned Lighting \_\_\_\_\_  
 Other \_\_\_\_\_

### CHEMICALS

Bases \_\_\_\_\_  
 Acids \_\_\_\_\_  
 Solvents \_\_\_\_\_  
 Radioisotopes \_\_\_\_\_  
 Carcinogens/Regulated \_\_\_\_\_  
 Chemical Waste Storage \_\_\_\_\_  
 Biological Storage \_\_\_\_\_  
 Radioisotope Storage \_\_\_\_\_  
 Chemical Storage \_\_\_\_\_

### ARCHITECTURAL

Floor  
     VCT (Chemical Resistant) \_\_\_\_\_  
     VCT \_\_\_\_\_  
     Welded Seam Sheet Vinyl \_\_\_\_\_  
     Epoxy \_\_\_\_\_  
     Carpet ● \_\_\_\_\_  
     Sealed Concrete \_\_\_\_\_  
     Terrazzo \_\_\_\_\_  
     Tile \_\_\_\_\_  
     Other \_\_\_\_\_  
 Base  
     4" Vinyl \_\_\_\_\_  
     Carpet ● \_\_\_\_\_  
     Integral w/floor \_\_\_\_\_  
     Terrazzo \_\_\_\_\_  
     Tile \_\_\_\_\_  
     Other \_\_\_\_\_  
 Partitions  
     Gyp Board, Epoxy Paint \_\_\_\_\_  
     Gyp Board, Paint ● \_\_\_\_\_  
     Other \_\_\_\_\_  
 Ceiling  
     Open \_\_\_\_\_  
     Acoustical Tile ● \_\_\_\_\_  
     Gyp Board, Epoxy Paint \_\_\_\_\_  
     Height 9'-0" min. \_\_\_\_\_  
 Doors  
     3'-6" x 7' \_\_\_\_\_  
     3'-0" x 7' ● \_\_\_\_\_  
     1'-6" x 7' \_\_\_\_\_  
     Light Tight Rotating Door \_\_\_\_\_  
     Vision Panel ● \_\_\_\_\_  
 Natural Daylight \_\_\_\_\_

### TECHNOLOGY

Computer ● \_\_\_\_\_  
 DVD or Bluray Player \_\_\_\_\_  
 Document Camera \_\_\_\_\_  
 Audio System \_\_\_\_\_  
 Touch-Screen Controls \_\_\_\_\_  
     Lighting \_\_\_\_\_  
     Audio/Visual \_\_\_\_\_  
 Overhead Projector \_\_\_\_\_  
 Projection Screen(s) \_\_\_\_\_  
 Lecture Capture \_\_\_\_\_  
 Flat Panel Monitor \_\_\_\_\_  
 Digital Signage \_\_\_\_\_  
 SMART Board Technology \_\_\_\_\_

### MOVABLE EQUIPMENT

Movable Chairs \_\_\_\_\_  
 Task Chair(s) ● \_\_\_\_\_  
 Movable Desks ● \_\_\_\_\_  
 Movable Laboratory Stations \_\_\_\_\_  
 Lounge Seating \_\_\_\_\_  
 Movable Table(s) \_\_\_\_\_  
 Recycling \_\_\_\_\_  
 Bookshelves \_\_\_\_\_  
 Refrigerator \_\_\_\_\_  
 Microwave \_\_\_\_\_  
 Coffeemaker \_\_\_\_\_  
 Copier/Scanner/Printer \_\_\_\_\_

### FIXED EQUIPMENT

Bulletin Board \_\_\_\_\_  
 Marker Board \_\_\_\_\_  
 Clock \_\_\_\_\_  
 Pencil Sharpener \_\_\_\_\_  
 Teaching Podium \_\_\_\_\_  
 Laboratory Workstations \_\_\_\_\_  
 Coat Hook(s) ● \_\_\_\_\_

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																														
REMARKS																																																																																																																																																																																																																																																																																																																														

# Appendix A: Room Data Sheets

Room ID No.: 8I.1-3  
 Room Name: Student Workers (Lab Prep)  
 Unit: Physics Department

Occupancy: 1  
 Room Size: 35 ASF x 3

<table border="0" style="width: 100%;"> <tr> <td colspan="2" style="background-color: black; color: white; font-weight: bold; padding: 2px;">UTILIZATION</td> </tr> <tr> <td style="padding: 2px;">Hours of Use</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td style="padding: 2px;">    8 hours/day</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td style="padding: 2px;">    14 hours/day</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td style="padding: 2px;">    24 hours/day</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td colspan="2" style="background-color: black; Occupancy: 24  
 Room Size: 960 ASF

### UTILIZATION

Hours of Use  
 8 hours/day \_\_\_\_\_  
 14 hours/day ● \_\_\_\_\_  
 24 hours/day \_\_\_\_\_

### MECHANICAL

Temperature  
 68°-75° ± 2°F ● \_\_\_\_\_  
 Other \_\_\_\_\_  
 Humidity  
 Uncontrolled ● \_\_\_\_\_  
 Other \_\_\_\_\_  
 Minimum Air Changes/Hr. 6 \_\_\_\_\_  
 Air Recirculation \_\_\_\_\_  
 Air Pressure Positive \_\_\_\_\_  
 Air Pressure Negative ● \_\_\_\_\_  
 Additional Supply Air Filtration \_\_\_\_\_  
 Additional Exhaust Air Filtration \_\_\_\_\_

### HOODS

Chemical Fume Hood \_\_\_\_\_  
 Radioisotope Hood \_\_\_\_\_  
 Horizontal Laminar Flow Hood \_\_\_\_\_  
 Biological Safety Cabinet \_\_\_\_\_  
 Snorkel \_\_\_\_\_  
 Canopy Hood \_\_\_\_\_  
 Low Slotted Exhaust \_\_\_\_\_  
 Equipment Exhaust \_\_\_\_\_  
 Other \_\_\_\_\_

### LABORATORY EQUIPMENT

Vibration Sensitive ● \_\_\_\_\_  
 Light Sensitive ● \_\_\_\_\_  
 Vibration Producing \_\_\_\_\_  
 Heat Producing \_\_\_\_\_  
 Noise Producing \_\_\_\_\_

### PLUMBING

Laboratory Gas (LG) ● \_\_\_\_\_  
 Laboratory Vacuum (LV) ● \_\_\_\_\_  
 Laboratory Air (LA) ● \_\_\_\_\_  
 Compressed Air, 100 psi (A) \_\_\_\_\_  
 Industrial Hot Water (IHW) \_\_\_\_\_  
 Industrial Cold Water (ICW) \_\_\_\_\_  
 Potable Hot Water (HW) \_\_\_\_\_  
 Potable Cold Water (CW) \_\_\_\_\_  
 Purified Water (PW) \_\_\_\_\_  
 Chilled Water (CHW S/R) \_\_\_\_\_  
 Steam \_\_\_\_\_  
 Condensate Return \_\_\_\_\_  
 Carbon Dioxide (CO<sub>2</sub>) \_\_\_\_\_  
 Nitrogen Gas (N<sub>2</sub>) \_\_\_\_\_  
 Cylinder Gases \_\_\_\_\_  
   Inert \_\_\_\_\_  
   Flammable \_\_\_\_\_  
   Toxic \_\_\_\_\_  
 Floor Drain (FD) \_\_\_\_\_  
 Floor Sink (FS) \_\_\_\_\_  
 Safety Shower/Eyewash (SS) ● \_\_\_\_\_  
 Drench Hose (DH) \_\_\_\_\_

### ELECTRICAL

110V, 20A, 1 Phase ● \_\_\_\_\_  
 208V, 30A, 1 Phase one \_\_\_\_\_  
 208V, 30A, 3 Phase \_\_\_\_\_  
 480V, 100A, 3 Phase \_\_\_\_\_  
 Isolated Ground Outlet \_\_\_\_\_  
 Emergency Power one \_\_\_\_\_  
 UPS (OFOI) \_\_\_\_\_  
 Phone \_\_\_\_\_  
 Data ● \_\_\_\_\_  
 In Use Light \_\_\_\_\_  
 Task Lighting \_\_\_\_\_  
 Lighting Level  
   100 fc at bench/desk ● \_\_\_\_\_  
   75 fc at bench/desk \_\_\_\_\_  
 Safe Light \_\_\_\_\_  
 Special Lighting \_\_\_\_\_  
 Darkenable \_\_\_\_\_  
 Zoned Lighting ● \_\_\_\_\_  
 Other \_\_\_\_\_

### CHEMICALS

Bases \_\_\_\_\_  
 Acids \_\_\_\_\_  
 Solvents \_\_\_\_\_  
 Radioisotopes \_\_\_\_\_  
 Carcinogens/Regulated \_\_\_\_\_  
 Chemical Waste Storage \_\_\_\_\_  
 Biological Storage \_\_\_\_\_  
 Radioisotope Storage \_\_\_\_\_  
 Chemical Storage \_\_\_\_\_

### ARCHITECTURAL

Floor  
 VCT (Chemical Resistant) \_\_\_\_\_  
 VCT \_\_\_\_\_  
 Welded Seam Sheet Vinyl ● \_\_\_\_\_  
 Epoxy \_\_\_\_\_  
 Carpet \_\_\_\_\_  
 Sealed Concrete \_\_\_\_\_  
 Terrazzo \_\_\_\_\_  
 Tile \_\_\_\_\_  
 Other \_\_\_\_\_  
 Base  
 4" Vinyl ● \_\_\_\_\_  
 Carpet \_\_\_\_\_  
 Integral w/floor \_\_\_\_\_  
 Terrazzo \_\_\_\_\_  
 Tile \_\_\_\_\_  
 Other \_\_\_\_\_  
 Partitions  
 Gyp Board, Epoxy Paint \_\_\_\_\_  
 Gyp Board, Paint ● \_\_\_\_\_  
 Other \_\_\_\_\_  
 Ceiling  
 Open \_\_\_\_\_  
 Acoustical Tile ● \_\_\_\_\_  
 Gyp Board, Epoxy Paint \_\_\_\_\_  
 Height 9'-0" min. \_\_\_\_\_  
 Doors  
 3'-6" x 7' \_\_\_\_\_  
 3'-0" x 7' ● \_\_\_\_\_  
 1'-6" x 7' ● \_\_\_\_\_  
 Light Tight Rotating Door \_\_\_\_\_  
 Vision Panel \_\_\_\_\_  
 Natural Daylight \_\_\_\_\_

### TECHNOLOGY

Computer ● \_\_\_\_\_  
 DVD or Bluray Player ● \_\_\_\_\_  
 Document Camera ● \_\_\_\_\_  
 Audio System \_\_\_\_\_  
 Touch-Screen Controls \_\_\_\_\_  
 Lighting \_\_\_\_\_  
 Audio/Visual \_\_\_\_\_  
 Overhead Projector ● \_\_\_\_\_  
 Projection Screen(s) ● \_\_\_\_\_  
 Lecture Capture \_\_\_\_\_  
 Flat Panel Monitor \_\_\_\_\_  
 Digital Signage \_\_\_\_\_  
 SMART Board Technology \_\_\_\_\_

### MOVABLE EQUIPMENT

Movable Chairs ● \_\_\_\_\_  
 Task Chair(s) \_\_\_\_\_  
 Movable Desks \_\_\_\_\_  
 Movable Laboratory Stations \_\_\_\_\_  
 Lounge Seating \_\_\_\_\_  
 Movable Table(s) \_\_\_\_\_  
 Recycling \_\_\_\_\_  
 Bookshelves \_\_\_\_\_  
 Refrigerator \_\_\_\_\_  
 Microwave \_\_\_\_\_  
 Coffeemaker \_\_\_\_\_  
 Copier/Scanner/Printer \_\_\_\_\_

### FIXED EQUIPMENT

Bulletin Board ● \_\_\_\_\_  
 Marker Board ● \_\_\_\_\_  
 Clock ● \_\_\_\_\_  
 Pencil Sharpener ● \_\_\_\_\_  
 Teaching Podium ● \_\_\_\_\_  
 Laboratory Workstations ● \_\_\_\_\_  
 Coat Hook(s) ● \_\_\_\_\_

### ROOM DESCRIPTION

 Coat Hook(s) \_\_\_\_\_

### ROOM DESCRIPTION

Circular room layout with 30' diameter dome that protrudes about 25' above floor.

### REMARKS

- A. Good air circulation required.
- B. Circular room with 2 rows of semi-circular bench seating arrangement. ADA accessible.

# Appendix A: Room Data Sheets

Room ID No.: 8V2.1-2  
 Room Name: Storage  
 Unit: Physics Department

Occupancy: 1  
 Room Size: 240 ASF x 2

REMARKS		
A.		3 piers connected to non-vibrating foundation.
B.		Red lighting placed low to ground. General full-cutoff lighting with on/off switch.
C.		Slide-off roof must protect telescopes/piers when in place, role off to provide view of sky during observing sessions. Rigid floor with isolation of telescope piers. High walls to block campus lights.

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																																						
Uncovered locked rooftop observing area with roll-off roof.																																																																																																																																																																																																																																																																																																																																						
REMARKS																																																																																																																																																																																																																																																																																																																																						
A.	3 piers connected to non-vibrating foundation.																																																																																																																																																																																																																																																																																																																																					
B.	Red lighting placed low to ground. General full-cutoff lighting with on/off switch.																																																																																																																																																																																																																																																																																																																																					
C.	Slide-off roof must protect telescopes/piers when in place, role off to provide view of sky during observing sessions. Rigid floor with isolation of telescope piers. High walls to block campus lights.																																																																																																																																																																																																																																																																																																																																					

# Appendix A: Room Data Sheets

Room ID No.: 8W3  
 Room Name: Waiting Area  
 Unit: Physics Department

Occupancy: 20  
 Room Size: 300 ASF

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																																				
Uncovered rooftop space for people to gather while waiting to use telescopes.																																																																																																																																																																																																																																																																																																																																				
REMARKS																																																																																																																																																																																																																																																																																																																																				
A.	Red lighting placed low to ground. General full-cutoff lighting with on/off switch.																																																																																																																																																																																																																																																																																																																																			
B.	Floor will be exposed to elements and will need to be durable.																																																																																																																																																																																																																																																																																																																																			

# Appendix A: Room Data Sheets

Room ID No.: 8W4  
 Room Name: Storage  
 Unit: Physics Department

Occupancy: 1  
 Room Size: 120 ASF

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																																		
REMARKS																																																																																																																																																																																																																																																																																																																																		
1.	Industrial shelving units																																																																																																																																																																																																																																																																																																																																	

# Appendix A: Room Data Sheets

Room ID No.: 8Y.1-2  
 Room Name: Student Organization Space  
 Unit: Physics Department

Occupancy: 2  
 Room Size: 120 ASF x 2

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																																		
REMARKS																																																																																																																																																																																																																																																																																																																																		
1.	Requires floor, wall and ceiling radiation protection.																																																																																																																																																																																																																																																																																																																																	
2.	Requires three levels of alarmed security access.

# Appendix A: Room Data Sheets

Room ID No.: 10D2  
 Room Name: Fish Culture  
 Unit: River Studies Center

Occupancy:  
 Room Size: 160 ASF

### UTILIZATION

Hours of Use  
 8 hours/day \_\_\_\_\_  
 14 hours/day \_\_\_\_\_  
 24 hours/day

### MECHANICAL

Temperature  
 68°-75° ± 2°F   
 Other \_\_\_\_\_  
 Humidity  
 Uncontrolled   
 Other \_\_\_\_\_  
 Minimum Air Changes/Hr. 4  
 Air Recirculation \_\_\_\_\_  
 Air Pressure Positive \_\_\_\_\_  
 Air Pressure Negative   
 Additional Supply Air Filtration \_\_\_\_\_  
 Additional Exhaust Air Filtration \_\_\_\_\_

### HOODS

Chemical Fume Hood \_\_\_\_\_  
 Radioisotope Hood \_\_\_\_\_  
 Horizontal Laminar Flow Hood \_\_\_\_\_  
 Biological Safety Cabinet \_\_\_\_\_  
 Snorkel \_\_\_\_\_  
 Canopy Hood \_\_\_\_\_  
 Low Slotted Exhaust \_\_\_\_\_  
 Equipment Exhaust \_\_\_\_\_  
 Other \_\_\_\_\_

### LABORATORY EQUIPMENT

Vibration Sensitive \_\_\_\_\_  
 Light Sensitive \_\_\_\_\_  
 Vibration Producing \_\_\_\_\_  
 Heat Producing \_\_\_\_\_  
 Noise Producing \_\_\_\_\_

### PLUMBING

Laboratory Gas (LG) \_\_\_\_\_  
 Laboratory Vacuum (LV) \_\_\_\_\_  
 Laboratory Air (LA)   
 Compressed Air, 100 psi (A) \_\_\_\_\_  
 Industrial Hot Water (IHW)   
 Industrial Cold Water (ICW)   
 Potable Hot Water (HW) \_\_\_\_\_  
 Potable Cold Water (CW) \_\_\_\_\_  
 Purified Water (PW)   
 Chilled Water (CHW S/R) \_\_\_\_\_  
 Well Water   
 Condensate Return \_\_\_\_\_  
 Carbon Dioxide (CO<sub>2</sub>) \_\_\_\_\_  
 Nitrogen Gas (N<sub>2</sub>) \_\_\_\_\_  
 Cylinder Gases  
     Inert   
     Flammable \_\_\_\_\_  
     Toxic \_\_\_\_\_  
 Floor Drain (FD)   
 Floor Sink (FS) \_\_\_\_\_  
 Safety Shower/Eyewash (SS)   
 Drench Hose (DH) \_\_\_\_\_

### ELECTRICAL

110V, 20A, 1 Phase   
 208V, 30A, 1 Phase \_\_\_\_\_  
 208V, 30A, 3 Phase \_\_\_\_\_  
 480V, 100A, 3 Phase \_\_\_\_\_  
 Isolated Ground Outlet \_\_\_\_\_  
 Emergency Power \_\_\_\_\_  
 UPS (OFOI) \_\_\_\_\_  
 Phone \_\_\_\_\_  
 Data   
 In Use Light \_\_\_\_\_  
 Task Lighting \_\_\_\_\_  
 Lighting Level  
     100 fc at bench/desk   
     75 fc at bench/desk \_\_\_\_\_  
 Safe Light \_\_\_\_\_  
 Special Lighting \_\_\_\_\_  
 Darkenable \_\_\_\_\_  
 Zoned Lighting \_\_\_\_\_  
 Other \_\_\_\_\_

### CHEMICALS

Bases \_\_\_\_\_  
 Acids \_\_\_\_\_  
 Solvents \_\_\_\_\_  
 Radioisotopes \_\_\_\_\_  
 Carcinogens/Regulated \_\_\_\_\_  
 Chemical Waste Storage \_\_\_\_\_  
 Biological Storage \_\_\_\_\_  
 Radioisotope Storage \_\_\_\_\_  
 Chemical Storage \_\_\_\_\_

### ARCHITECTURAL

Floor  
     VCT (Chemical Resistant) \_\_\_\_\_  
     VCT \_\_\_\_\_  
     Welded Seam Sheet Vinyl   
     Epoxy \_\_\_\_\_  
     Carpet \_\_\_\_\_  
     Sealed Concrete \_\_\_\_\_  
     Terrazzo \_\_\_\_\_  
     Tile \_\_\_\_\_  
     Other \_\_\_\_\_  
 Base  
     4" Vinyl   
     Carpet \_\_\_\_\_  
     Integral w/floor \_\_\_\_\_  
     Terrazzo \_\_\_\_\_  
     Tile \_\_\_\_\_  
     Other \_\_\_\_\_  
 Partitions  
     Gyp Board, Epoxy Paint \_\_\_\_\_  
     Gyp Board, Paint   
     Other \_\_\_\_\_  
 Ceiling  
     Open \_\_\_\_\_  
     Acoustical Tile   
     Gyp Board, Epoxy Paint \_\_\_\_\_  
     Height \_\_\_\_\_  
 Doors  
     3'-6" x 7' \_\_\_\_\_  
     3'-0" x 7'   
     1'-6" x 7' \_\_\_\_\_  
     Light Tight Rotating Door \_\_\_\_\_  
     Vision Panel \_\_\_\_\_  
 Natural Daylight \_\_\_\_\_

### TECHNOLOGY

Computer \_\_\_\_\_  
 DVD or Bluray Player \_\_\_\_\_  
 Document Camera \_\_\_\_\_  
 Audio System \_\_\_\_\_  
 Touch-Screen Controls \_\_\_\_\_  
     Lighting \_\_\_\_\_  
     Audio/Visual \_\_\_\_\_  
 Overhead Projector \_\_\_\_\_  
 Projection Screen(s) \_\_\_\_\_  
 Lecture Capture \_\_\_\_\_  
 Flat Panel Monitor \_\_\_\_\_  
 Digital Signage \_\_\_\_\_  
 SMART Board Technology \_\_\_\_\_

### MOVABLE EQUIPMENT

Movable Chairs   
 Task Chair(s) \_\_\_\_\_  
 Movable Desks \_\_\_\_\_  
 Movable Laboratory Stations \_\_\_\_\_  
 Lounge Seating \_\_\_\_\_  
 Movable Table(s) \_\_\_\_\_  
 Recycling \_\_\_\_\_  
 Bookshelves \_\_\_\_\_  
 Refrigerator \_\_\_\_\_  
 Microwave \_\_\_\_\_  
 Coffeemaker \_\_\_\_\_  
 Copier/Scanner/Printer \_\_\_\_\_

### FIXED EQUIPMENT

Bulletin Board \_\_\_\_\_  
 Marker Board \_\_\_\_\_  
 Clock \_\_\_\_\_  
 Pencil Sharpener \_\_\_\_\_  
 Teaching Podium \_\_\_\_\_  
 Laboratory Workstations   
 Coat Hook(s) \_\_\_\_\_

### ROOM DESCRIPTION

### REMARKS

1. (1) Sink @ perimeter

# Appendix A: Room Data Sheets

Room ID No.: 12A  
 Room Name: Arrival Space Primary  
 Unit: Building Support

Occupancy:  
 Room Size: 1,500 ASF

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																														
REMARKS																																																																																																																																																																																																																																																																																																																														

# Appendix A: Room Data Sheets

Room ID No.: 12D  
 Room Name: Supply Storage  
 Unit: Building Support

Occupancy:  
 Room Size: 400 ASF

REMARKS																																																																																																																																																																																																																																																																																																																														

# Appendix A: Room Data Sheets

Room ID No.: 12J.1-4  
 Room Name: IT & Electrical Closets  
 Unit: Building Support

Occupancy:  
 Room Size: 100 SF x 4

ROOM DESCRIPTION																																																																																																																																																																																																																																																																																																																														
REMARKS																																																																																																																																																																																																																																																																																																																														

# Appendix A: Room Data Sheets

Room ID No.: 12L.1-8  
 Room Name: Custodial Closets  
 Unit: Building Support

Occupancy:  
 Room Size: 100 ASF x 8

<table border="0" style="width: 100%;"> <tr> <td colspan="2" style="background-color: black; color: white; font-weight: bold; padding: 2px;">UTILIZATION</td> </tr> <tr> <td style="padding: 2px;">Hours of Use</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td style="padding: 2px;">    8 hours/day</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td style="padding: 2px;">    14 hours/day</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td style="padding: 2px;">    24 hours/day</td> <td style="padding: 2px;">_____</td> </tr> <tr> <td colspan="2" style="background-color: black; # Executive Summary

---

## EXECUTIVE SUMMARY

### Introduction

Paulien & Associates, Inc. contracted with River Architects, Inc. to provide planning services for the Cowley Hall Addition/Renovation building program at University of Wisconsin-La Crosse (UW-L). The intent was to provide a light version of a pre-design study. Two sets of on-site work sessions were conducted discussing the space needs of the science programs in the College of Science and Health (CSH). In 2007, Paulien & Associates conducted a Campuswide Classroom Mix Study at UW-L, the outcomes of which formed the basis for the classroom needs outline in the program. Several draft programs were sent out for review to the UW-L Executive Committee and academic departments included in the study as well as the Department of State Facilities (DSF), and representatives from the University of Wisconsin System (UWS).

The data used in this analysis represents the activities for the Fall 2009 and Spring 2010 semesters. Facilities data was collected from the Office of Facilities Planning and Management. Course data was collected from the Registrar's office.

### Objectives and Assumptions

The overall objective is to provide the science programs with an adequate amount of space to conduct the activities required in each type of space represented in the building program. To the degree possible, space efficiencies, including sharing of certain spaces like conference rooms, core laboratory service spaces, and storage were explored and are reflected in the program. A classroom mix analysis was not conducted as part of the scope of services. Rather the outcomes of the 2007 Campuswide Classroom Mix Study were used with some modifications to determine classroom needs.

For the science programs included in the program, it is anticipated that there will be undergraduate student growth of three percent (3%) by 2015 and an overall growth of five percent (5%) by 2020. No growth in graduate students is expected.

### Fall Student Credit Hour Projections

		2008	2009		2015		2020

	<b>TOTAL</b>	<b>33,123</b>	<b>33,852</b>	<b>2%</b>	<b>34,853</b>	<b>3%</b>	<b>35,623</b>	<b>5%</b>

### Teaching Laboratory Utilization

For Fall 2009 the science programs had 28 teaching laboratories. These laboratories averaged 22 hours per week at 86% student station occupancy. Biology and Chemistry have the largest number of laboratories and schedule them very well considering the variety of subjects each covers.

#### Teaching Laboratory Utilization Analysis Summary - Fall 2009

Department / Program Unit	No. of Rooms	Average Room Size	Average ASF per Station	Average Section Size	Average Weekly Room Hours	Hours in Use Student Station Occupancy %
Biology	7	1,134	43	22	29	86%
Chemistry	8	1,226	58	19	24	92%
Geography & Earth Science	4	1,001	32	25	16	78%
Mathematics	2	782	17	34	24	76%
Microbiology	4	998	43	17	19	79%
Misc Instructional Support Spaces	1	1,140	29	40	5	100%
Physics & Astronomy	2	1,335	48	24	21	88%
<i>Total No. of Rooms = 28</i>	<b>AVERAGE</b>	1,111	44	23	22	86%

The University of Wisconsin System utilization goals for teaching laboratories are 24 weekly room hours at 80% student station occupancy rate. This results in a weekly seat hour goal of 19.2 hours per seat. Even though the overall hours per week are a little less than the 24 hour weekly room hour target, the student station occupancy rate is greater than the UWS goal of 80%. The net result is that the science programs, on average, are meeting the 19.2 hours per seat.

Because the use of the existing laboratories is very strong with the occupancy rates being very good, there is little room for student growth. This is why more laboratories are needed than currently exist.

**Weekly Room Hours:**

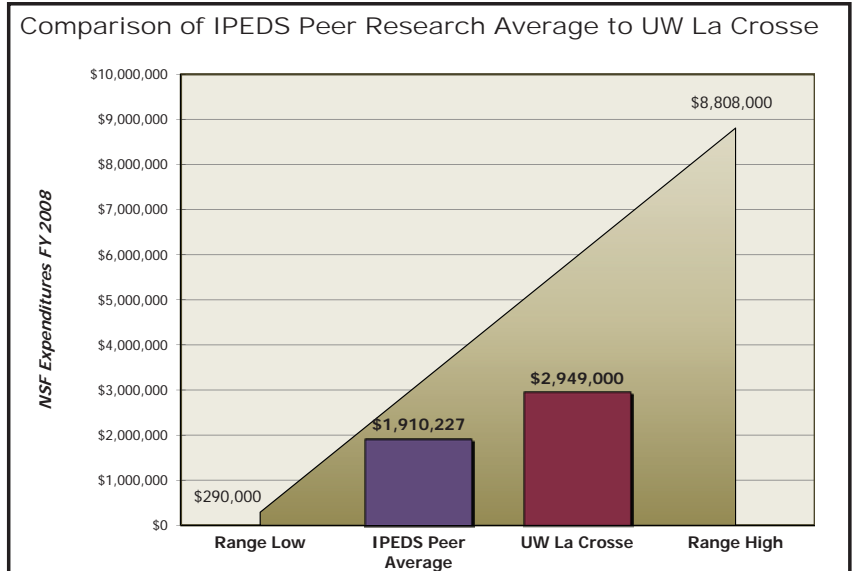

**Student Station Occupancy:**

**Research**

Because of UW-L's and CSH's commitment to grant funded, faculty, and undergraduate student research, there is a very strong need for additional research space. In order to assess UW-L's research activity, research expenditures from the latest published set of National Science Foundation data was analyzed (fiscal year 2008) and compared to the Integrated Postsecondary Education Data System's (IPEDS) list of comparison schools for UW-L. The range of expenditures from the IPED's comparative list was from a low of \$0.3 million to a high of \$8.8 million. UW-L at \$2.9 million has 54% more sponsored research activity than the average of its IPED's peer list (for more details please refer to Section 1).

Because of CSH's research commitment, research space was provided for each faculty member. It is assumed that faculty and students will share this space. The arrangement of lab space is unique to each discipline. Some faculty members require larger lab spaces due to the types of equipment and specimens being examined, some preferred shared laboratory space, while others require smaller spaces for computation or team rooms.

**Office Space**

CSH is currently short of office space in Cowley Hall. There is a 27% shortage in the number of offices. Some of these individuals are housed in buildings other than Cowley (such as the Dean's suite which is housed in Graff Main Hall and Mitchell Hall) and some are doubling up in an office space. After factoring office needs for graduate and teaching assistants, the deficit in the number of office spaces increases to 50%. UWS has an established set of office space guidelines which was used in determining the size of offices needed for each employee type.

No. of Existing Offices Compared to No. of Offices Needed

UNIT	No. of Existing Offices	No. of Faculty & Staff*	Graduate and Teaching Assistants	TOTAL	Difference (Existing - Faculty & Staff)	Difference (Existing - Total)
3 • Biology Department	28	40	50	90	(12)	(62)
4 • Chemistry Department	23	31	0	31	(8)	(8)

10 • River Studies Center**	0	0	0	0	0	0
11 • College of Science and Health – Dean's Office	0	8	0	8	(8)	(8)
<b>TOTAL</b>	<b>114</b>	<b>156</b>	<b>70</b>	<b>226</b>	<b>(42)</b>	<b>(112)</b>

## Program Space Allocation

The table below summarizes the program space allocation by unit and then by space type. A total of 208,149 Net Usable Square Feet has been programmed which includes: 13 classrooms and 40 laboratories; the College of Science and Health Dean's suite; the departments of Biology, Chemistry, Geography & Earth Science, Mathematics, Microbiology, Physics, Radiation Center, River Studies Center and building support spaces.

### Program Summary by Unit and Space Use Type

Unit	Classroom Space (100s)	Teaching Laboratory Space (210s)	Open Laboratory Space (220s)	Research Laboratory Space (250s)	Office Space (300s)	Other Departmental Space (400s - 700s)	Student Lounge and Dining (630 and 650)	Faculty Support (650)	Building Support	TOTAL AREA	Percent of Total
1 • Classrooms	21,800									21,800	10%
2 • Misc. Instructional/Support Spaces		3,240	3,844		5,121	3,040	2,350	1,280		18,875	9%
3 • Biology Department		19,200	480	13,200	8,498	8,330				49,708	24%
4 • Chemistry Department		24,160	1,320	6,600	4,496	360				36,936	18%
5 • Geography & Earth Science		6,880		2,640	1,808	360				11,688	6%
6 • Mathematics Department		3,200		720	4,988	1,215				10,123	5%
7 • Microbiology Department		10,240		5,760	3,403	360				19,763	9%
8 • Physics Department		5,760	3,680	5,440	1,902	3,840				20,622	10%
9 • Radiation Center			2,720	2,560	120					5,400	3%
10 • River Studies Center				3,520						3,520	2%
11 • College of Science and Health – Dean's Office					1,994					1,994	1%
12 • Building Support						1,740			5,980	7,720	4%
<b>TOTAL AREA</b>	<b>21,800</b>	<b>72,680</b>	<b>12,044</b>	<b>40,440</b>	<b>32,330</b>	<b>19,245</b>	<b>2,350</b>	<b>1,280</b>	<b>5,980</b>	<b>208,149</b>	<b>100%</b>
<b>Percent of Total</b>	<b>10%</b>	<b>35%</b>	<b>6%</b>	<b>19%</b>	<b>16%</b>	<b>9%</b>	<b>1%</b>	<b>1%</b>	<b>3%</b>	<b>100%</b>	

The program is primarily comprised of instructional space (51%), research space (19%), and offices (16%). Approximately eleven percent (11%) of the building is other academic support space (such as vivarium, herbarium, greenhouse, planetarium, specimen space, and resource spaces), student lounge and dining services, and faculty support spaces.

# Section 1

## Program Space Allocation

---

## 1.0 PROGRAM SPACE ALLOCATION

### Background

Paulien & Associates along with River Architects conducted two on-site work sessions at University of Wisconsin-LaCrosse (UW-L) to determine a lite version of a pre-design study for the Cowley Hall Addition/Renovation building program. These work sessions were held May 5th and 6th and July 14th and 15th of 2010. During the work sessions, space needs for the science programs at UW-L were discussed. Additionally, the outcomes of the 2007 Campuswide Classroom Mix Study performed by Paulien & Associates, Inc. were the basis for the classroom needs outlined in the program.

Several draft programs were sent out for review to the UW-L Executive Committee and academic programs included in the study, Department of State Facilities (DSF), and University of Wisconsin System (UWS) in late June, July and September, 2010. Adjustments to each unit's space program were made as comments were received or new information was discovered. The building program described and illustrated in this section reflects the outcomes of those work sessions and program drafts. Each unit included in the building program has been assigned a number in the building program plan summary and each space or functional area under the unit has been assigned a reference number. Space efficiencies, including sharing of certain spaces like conference rooms, were explored and discussed throughout all work sessions.

Each unit as defined in the program summary is discussed in this section. Office spaces are not discussed in detail.

### The College of Science and Health

The College of Science and Health (CSH) is comprised of the following departments: Biology; Chemistry; Computer Science; Exercise and Sport Science; Geography/Earth Science; Health Education and Health Promotion; Health Professions; Mathematics; Microbiology; Physics; and Recreation Management and Therapeutic Recreation. Additionally, CSH has about ten different interdisciplinary centers: Center for Geographic Information Science (G.I.S.); Center on Disability Health and Adapted Physical Activity; Health Science Consortium; Human Performance Laboratory; Institute for Biomolecular Sciences; La Crosse Institute for Movement Studies (L.I.M.S.); River Studies Center; Science Technology Engineering and Mathematics (S.T.E.M.) Alliance; and the Statistical Consulting Center. CSH also has core facilities that are shared between departments such as the Radiation Center, greenhouse space, core microscope suite, and its animal care facilities (vivarium) which are accredited through the Association for Assessment and Accreditation of Laboratory Animal Care International (AAALAC). Some of these facilities may be under a particular department's purview.

CSH has a very strong commitment to research not only for faculty and graduate students but for its undergraduate student population as well. Its students are paired with faculty mentors and may acquire funding from various grant programs at the College level as well as the University level. This student research is highlighted at UW-L's symposium on undergraduate research.

Not all of CSH's programs and centers space needs are addressed in this program. Biology, Chemistry, Geography & Earth Science, Mathematics, Microbiology, Physics, the Radiation Center, River Studies Center, and the CSH Dean's suite are specifically addressed. Also addressed are the animal facilities and greenhouse space which are under Biology. Other units also have specialty spaces such as the observatory and planetarium under Physics. On the whole, CSH is short of space in all space categories.

**Research**

Because of UW-L's and CSH's commitment to faculty and undergraduate student research, there is a very strong need for additional research space. To put UW-L's research activity into perspective, research expenditures for fiscal year 2008 (the latest set of data published) from the National Science Foundation were obtained as well as a list of comparison institutions for UW-L from the National Center for Education Statistics' (NCES) Integrated Postsecondary Education Data System (IPEDS).

The result of the IPEDS comparative list is that UW-L has 54% more sponsored research activity than the average of its peers. Radford University (Virginia) has the least amount of NSF research expenditures at \$290,000 while Humboldt State University (California) has the most at \$8,808,000 in research expenditures. While the average research expenditure amount is a little over \$1.9 million for the 22 institutions (excluding the University of Minnesota – Duluth), a trimmed average (excluding the lowest and the highest) would be about \$1.65 million. This indicates that UW-L has between 54% and 79% more research activity than that of the IPEDS' peer list. Much of this research activity is in the sciences.

For the study, research space was set up in modules of 320 which is a bay of 10' x 32'. To the degree possible, commonalities in research support spaces were discovered that could be shared between units.

Comparison of Research Activity IPEDS' Peer List	NSF Research Expenditures FY 2008
Appalachian State University	\$3,586,000
Central Connecticut State University	\$363,000
College of Charleston	\$5,397,000
Eastern Illinois University	\$713,000
Humboldt State University	\$8,808,000
Kutztown University of Pennsylvania	\$0
Murray State University	\$2,335,000
Northern Michigan University	\$944,000
Radford University	\$290,000
Rowan University	\$4,658,000
Salisbury University	\$0
Sonoma State University	\$652,000
SUNY College at Cortland	\$355,000
SUNY College at Oswego	\$1,026,000
The Collge of New Jersey	\$772,000
Truman State University	\$760,000
University of Minnesota - Duluth*	n/a
University of Northern Iowa	\$2,960,000
UW - Eau Claire	\$1,040,000
UW - Oshkosh	\$1,516,000
UW - Stevens Point	\$3,233,000
Western Illinois University	\$1,597,000
Winona State University	\$1,020,000
<b>AVERAGE</b>	<b>\$1,910,227</b>
<b>UW La Crosse</b>	<b>\$2,949,000</b>
<b>UW La Crosse Compared to Average</b>	<b>+\$1,038,773</b>
<b>UW La Crosse as a Percent of Average</b>	<b>+54%</b>

\* University of Minnesota reports as one Institution.

Comparison of IPEDS Peer Research Average to UW La Crosse

### Office Space

The table below illustrates the number of offices located in Cowley Hall as it is currently configured compared to the number of faculty and staff that need to be housed in this building. There is a 27% shortage in the number of offices needed to accommodate faculty and staff. After graduate and teaching assistants are added to the total, there is an approximate shortage of 50%. The shortage is now being accommodated by housing faculty and staff in other buildings or by putting more than one person in an office. The average office size in Cowley Hall 126 ASF, however, over 75% of the rooms are between 110 and 112 ASF.

No. of Existing Offices Compared to No. of Offices Needed

UNIT	No. of Existing Offices	No. of Faculty & Staff*	Graduate and Teaching Assistants	TOTAL	Difference (Existing - Faculty & Staff)	Difference (Existing - Total)
3 • Biology Department	28	40	50	90	(12)	(62)
4 • Chemistry Department	23	31	0	31	(8)	(8)
5 • Geography & Earth Science	13	12	0	12	1	1
6 • Mathematics Department	28	36	2	38	(8)	(10)
7 • Microbiology Department	10	17	18	35	(7)	(25)
8 • Physics Department	11	11	0	11	0	0
9 • Radiation Center	1	1	0	1	0	0
10 • River Studies Center**	0	0	0	0	0	0
11 • College of Science and Health – Dean's Office	0	8	0	8	(8)	(8)
<b>TOTAL</b>	<b>114</b>	<b>156</b>	<b>70</b>	<b>226</b>	<b>(42)</b>	<b>(112)</b>

\* Excludes Student Workers

\*\* Included in Biology

Every effort has been made to use UWS space guidelines where applicable—especially for office sizes. The following office sizes were used in the analysis:

#### Office Guidelines

OFFICE / Employee Type	ASF per Occupant
Dean	185
Associate Deans	160
Department Chairs	135
Directors	135
Center / Lab Directors	120
Faculty (including Visiting Full-time Faculty)	120
Professionals (includes Asst. Directors, Advisors, Coordinators, Instructional Academic Staff, Officers, Recruiters, Specialists, etc.)	120
Program Assistants	80
Graduate / Teaching Assistants	60
Student Workers	35

It should be noted that a circulation factor was added for office suite areas. Because it has not yet been decided which spaces will be designed as suites, a factor of 10% of the total office space has been added for suite circulation.

**Classrooms - 1**

A classroom mix analysis was not conducted as part of this scope of services. Therefore, the UW-L 2007 Campuswide Classroom Mix Study outcomes determined the number and size of classrooms needed for this program. However, Paulien & Associates notes that the number of classrooms in use Campuswide are fewer than the number of classrooms that were being used at the time of the 2007 study. Conversely, the number of weekly room hours of lecture or lecture type courses is over 8% more than what was projected in the 2007 Classroom Mix Study. This could create a need for ten additional classrooms beyond the 2007 study projection. Additionally, the section sizes are smaller than what was originally projected. This means that the classrooms planned at 150 and 190 station capacities in the 2007 study may need to have the capacities reduced or, conversely, the section sizes increased. During the on-site work sessions, discussions were held with the programs that primarily use the larger classrooms. It was decided that the capacities of the larger classrooms should be reduced to 120 and 150 stations and that two of each capacity size were needed. These adjustments were made and are reflected in the program.

The table following provides a crosswalk of the classrooms that were in use in Cowley Hall at the time of the UW-L 2007 Classroom Mix Study (using Fall 2005 as a snapshot in time) to the classrooms that were in use for Fall 2009.

Cowley Hall Classroom List

Room Id	ASF	Fall 2005				Fall 2009		Projected Stations in Feb. 2007 Report	
		Station Count	Classroom Type	Classroom Quality	Classroom Size/ Capacity	Existing Station Count	Classroom Size/ Capacity	Projected Station Count	Classroom Size/ Capacity
CH 0041	829	48	General	B	46 - 55	Now a Math Ed Lab		To be repurposed	
CH 0043	747	42	General	B	41 - 45	Now a Math Ed Lab		To be repurposed

CH 0141	599	40	General	A	36 - 40	40	36 - 40	24	25 and Under
CH 0149	599	40	General	A	36 - 40	40	36 - 40	24	25 and Under
CH 0151	1,223	89	General	A	76 - 100	89	76 - 100	49	46 - 55
CH 0156	1,560	138	General	A	131 - 150	138	131 - 150	138	131 - 150
CH 0201	805	54	General	A	46 - 55	54	46 - 55	32	31 - 35
CH 0215	1,170	48	Departmental	N/A	46 - 55	44	41 - 45	48	46 - 55
CH 0301	803	55	General	A	46 - 55	55	46 - 55	32	31 - 35
CH 0405	508	31	General	B	30 - 35	31	30 - 35	To be repurposed	
CH 0447	509	37	General	B	36 - 40	Now Chem Research.		To be repurposed	
CH 0103	1,080	This room was not a classroom in Fall 2005.				40	36 - 40		
CH 0252	1,180	This room was not a classroom in Fall 2005.				50	46 - 55		

To the degree possible all classrooms should allow for collaborative learning pedagogies. The classrooms should permit flexible seating arrangements with tables and chairs and multiple fronts of room. The seating arrangement for all larger classrooms should allow for two sets of fixed tables per tier so that students can turn around and work in groups between rows.

Each classroom should have an acceptable level of technology. All classrooms should be smart classrooms, containing at minimum a data projector, instructor computer, media player (DVD), and projection screen. UW-L will need to determine the use of stationary or movable instructor podiums and the use of wireless Internet connectivity within each room. At a minimum, each instructor podium should provide access to the Internet and rooms with windows should have appropriate window coverings to darken the room. Lighting should be multi-switched or fluorescent lamps with dimmable ballast should be installed to control illumination levels during multi-media presentations.

1 • Classrooms

Space No.	Functional Area	No. of Occupants	ASF per Occupant	ASF per Space	No. of Spaces	Total ASF	TOTAL AREA
1A	Table & Chair	24	25	600	2	1,200	<b>1,200</b>

1E	Fixed Table & Movable Chair	120	24	2,880	2	5,760	<b>5,760</b>
1F	Fixed Table & Movable Chair	150	24	3,600	2	7,200	<b>7,200</b>
1G	Classroom Support - Lecture Prep Storage			320	2	640	<b>640</b>
<b>TOTAL UNIT'S ASF</b>						<b>21,800</b>	

**Notes:** This classroom program only replaces the number of classrooms projected to be in Cowley from the February 2007 Classroom Mix Study. The capacities of the large classrooms have been reduced based upon current section sizes.

**Miscellaneous Instructional/Support Spaces - 2**

This category includes a number of spaces that benefit the campus community — both students and faculty — as well as the occupants of the building. Not every space is discussed below.

2A Science Education Methods Laboratory

This laboratory is currently the Physics workshop lab. It is used to instruct future educators how to teach physics. Per current CSH administration this lab will be used in the future to teach a variety of sciences and will be used by more than the Physics department.

2C Student Collaborative Learning Spaces

The Student Collaborative Learning Spaces should be scattered throughout the building and are best when open to a corridor. Depending on how the space is designed (i.e., whether as part of the circulation, separate alcoves, etc.) this will provide 112 to 135 student seats or 17 to 28 areas for four to eight students. Some of these areas may need to be large enough to accommodate six to eight students. These spaces should have at a minimum whiteboards, movable furniture, and electrical outlets. Other technology, such as large LCD monitors with appropriate collaborative software, should also be considered for some of the group areas. Collaborative areas are best located near classrooms and laboratories and faculty offices where students can gather before or after class or an instructor can easily continue a discussion with student(s) after a class in an active setting. Five percent (5%) of the total classroom and teaching laboratory space was used to determine the quantity of space.

# Section 1

## 2D Testing Room(s)

Theseroomsareusedforgivingmake-uporindividualizedtestsfortheprogrammed departments. Oneperfloorshouldbesufficient. Thesespacesshouldbecloseto offices so that the student(s) can be proctored.

## 2I Field Equipment Storage

ManyoftheprogramconductfieldworksuchastheRiverStudiesCenter, Biology, andGeography&EarthScience. This space will store the vast amount of equipment that is taken into the field.

## 2J Shop

Theshopformetals, wood, glassblowing, and repair are joint use facilities by all occupants of the building.

## 2K Faculty Resource Center

TheFacultyResourceCentersareintendedtobearareas that faculty can come and mingle, eat lunch, meet with students, and prepare for class.

<b>TOTAL UNIT'S ASF</b>							<b>18,875</b>

## Biology Department - 3

Biology has five different concentrations: general biology, biomedical science, cellular and molecular biology, aquatic science, and environmental sciences. Research focuses include not only the above concentrations but bioinformatics, genetics, developmental biology, organismal biology, parasitology, mycology, plant biology and toxicology.

The Biology Department includes a variety of spaces that are shared and/or unique. Included is the core microscope suite, a suite of spaces used for DNA amplification by the Polymerase Chain Reaction (PCR) (shared with Microbiology), a cold room (shared with Biochemistry and River Studies), the vivarium, herbarium, greenhouse, and specimen museum (shared with Geography & Earth Sciences).

Six different types of teaching laboratories are required for Biology – Introductory Biology; Anatomy/Physiology (which includes the replacement of the laboratory in Mitchell Hall); Aquatics; Animal/Organizimal; Botany; and Cell/Genetics. These laboratories require a plethora of support spaces including prep areas, storage, refrigeration, and equipment rooms. The Anatomy/Physiology laboratories are used by three departments within CSH – Biology, Exercise and Sport Science, and the Health Professions.

### 3S Biology Special Projects Laboratory

This laboratory is not a regularly scheduled laboratory. It is used for special projects, extra or make-up lab work, and individual laboratory work by students.

Research laboratories are based on an average of 160 ASF per faculty. For Biology it was desired that larger research labs be provided that could be shared among the focus areas and faculty; therefore two different research lab sizes are shown, 480 ASF for three faculty and 320 for two faculty. These concepts are in keeping with the 320 ASF lab module.

Chemistry Department - 4

The Department of Chemistry offers a B.S. in: chemistry; chemistry with the American Chemical Society's (ACS) certification; a business concentration; environmental science concentration; biochemistry (in the fields of biophysics, molecular biology, and enzymology); and a dual degree in chemistry-engineering. The chemistry subdisciplines include not only organic, analytical, physical, inorganic, and biochemistry but nuclear, polymer, biophysical, bioinorganic, and environmental. The number and types of laboratories needed reflect the variety of subdisciplines offered by the Chemistry program and the number of students it serves.

Chemistry has some core facilities such as the nuclear magnetic resonance (NMR) that it shares with other units. It also needs access to other core facilities such as cold rooms (under Biology), dry chemical and acid storage (under Misc. Instructional Space).

Two different types of research space were defined for Chemistry – a wet lab environment which is 400 ASF per faculty and a computational environment which is 200 ASF per faculty.

### Geography & Earth Science - 5

Geography and Earth Sciences is both a natural and social science. The topics offered by GES are cultural, physical or technical in nature. The natural sciences aspect of this department deals with earth sciences as well as geomorphology and weather requiring wet laboratories. The technical aspect employs geographical information systems requiring modified computer laboratory setups. The social science topics primarily need classroom space.

Because GES is a varied discipline, so too are the research space requirements. Faculty were split into two groups – those that require space for equipment and specimens and those that need computational type research spaces. Faculty requiring a wet-lab need 400 ASF per person whereas faculty needing computational space only need about 160 ASF per person. Those requiring larger spaces need fume hoods, water, air and gases. Storage (both cold and regular) is important as core specimens are collected. Many of these specimens are 6 feet long and a foot in diameter.

**Mathematics Department - 6**

The Mathematics Department serves the entire constituency at UW-L by teaching numerous core courses in addition to cultivating its own majors. The majority of its space needs are for classrooms and office space; however it does have need of some laboratory and research space and a resource library area.

**6K Laboratory - Math Education**

This space operates much like a classroom with the exception that it needs perimeter storage, flexible seating, and maybe running water. This space is used to teach students the methods of instructing mathematics at the K-12 level. The perimeter storage is for educational manipulatives as well as other curriculum resources. A flexible table and chair environment aids in student collaboration. The need for running water is to be discussed after enumeration.

**6L Math Research Team Rooms / Collaboratorium**

These spaces are designed to be flexible in nature and not necessarily checked out to one particular faculty member, although on a short term basis, the department would need to decide if that could be accommodated. This space would be used by both faculty and majors for research projects. Ideally the space itself would be designed flexibly so that it could be either small spaces or one larger space.

**6M Undergraduate Research / Library**

This space currently exists in Cowley Hall. This resource area provides books, computers, and a space for students to work together on projects with other students or faculty.

**Microbiology Department - 7**

The Microbiology Department and its major is distinct in that most comprehensive universities do not have a major in this discipline. Not only is there a major but there are four different tracks and two MS concentrations. For the undergraduate, the Department offers general microbiology and microbiology with concentrations in biomedicine, environmental science, and business. The M.S. Biology program has two concentrations in microbiology – general and clinical microbiology. The Clinical Laboratory Science major is also housed in this department. Research is conducted in the areas of food microbiology, microbial genetics, virology, environmental microbiology, immunology and pathogenic bacteriology.

Microbiology currently has four teaching laboratories – introductory microbiology; food safe microbiology (food, fermentation, and general education); medical

# Section 1

microbiology (immunology, pathogenic bacteriology, medical mycology and virology); and microbial genetics and physiology (microbial genetics, bacterial physiology, bacterial diversity, and aquatic microbial ecology). The medical microbiology lab needs to be separated into two different labs as the four areas of study do not co-habitate with each other due to cross-contamination concerns.

Research space needs were based on three different laboratory sizes. The lab sizes were established upon types of research being conducted and equipment needed inside the lab. There are two core facilities that are needed by Microbiology that are under other units as core facilities to be shared – the space needed for DNA amplification by the Polymerase Chain Reaction (PCR) and the Radioisotope laboratory.

## Physics Department - 8

The Physics program at UW-L is one of the top in the country, recently being recognized by the American Institute of Physics as one of the best programs in the country and consistently in the top ten institutions for awarding the most Bachelor of Science in Physics degrees. A dual degree in physics/engineering is also available. The program features emphasis in the following areas: astronomy, optics, and computational physics. Concentrations in business and biomedical engineering and biomechanics are available. Research opportunities exist in laser physics, nuclear physics, biomechanics, materials science, and computational physics.

In the future and with newer facilities, the Physics program intends on adding a studio lab environment for teaching. This is an environment where lecture as well as lab activities occur in one room. Students work collaboratively to complete assignments. Many of Physics' other instructional laboratories are classified as open laboratories due to the types of use and lack of regular scheduling that occur in these labs. These labs are used: to support other laboratory activities; for experiments that are set up for weeks at a time; for independent student activities either as a group or individually; and/or to house special equipment. Included as open laboratories are the holography lab, optics lab, advanced/experimental physics lab, and a computational computer lab.

The research space requirements are quite varied among the faculty. Three research sizes were agreed upon – an extra-large lab at 1,280 ASF per faculty housing a lot of equipment and paraphernalia; research labs for experimentalists at 640 ASF per faculty; and a joint use theorist laboratory for three faculty members at 960 ASF (320 ASF per faculty).

Other space needs include a planetarium, rooftop observatory, and student organization space.

### Radiation Center - 9

The Radiation Center is used by multiple programs. About half of the lab space is used for instructional support in the sciences. It is not always scheduled through the registrar's office but through the Center itself. The other half of the center is research space or research support space that supports two faculty members, one from Chemistry and the other from Physics. It is preferred that the Center be in the basement of the new facility.

### River Studies Center - 10

The River Studies Center is a research program that started out studying the upper Mississippi River and its related resources. Over time the Center has expanded its program to other aquatic resources across Wisconsin, the Midwest region, and other parts of the United States. It has interdisciplinary partnerships with multiple state and federal agencies. It provides research opportunities to not only graduate students but undergraduate students.

The Center requires three laboratory areas. One is a faculty student research wet lab; another is a Class 100 clean lab, and the third is another faculty student lab area.

# Section 1

This unit will share the field equipment storage facility (under Misc. Instructional Support Spaces) as well as the cold room listed under Biology.

## College of Science and Health – Dean’s Office - 11

CSH’s Dean’s office is currently housed in Graff Main Hall and other administrative functions, such as advising, are located in Mitchell Hall. It is desired that the new facility will house the Dean’s suite.

**Building Support - 12**

Most of the spaces outlined in this unit are typically included in the net to gross factor of a building. The primary and secondary arrival space not only includes the circulation space but is intended to include comfortable seating arrangements for students, faculty, and staff to mingle. It is also critical that the information technology group have a workspace/storage area in which to service the IT needs of the building.

**Comparison of Program Plan to Existing Space**

On the following page is a table illustrating the amount of space programmed compared to the amount of existing space in Cowley Hall. As can be seen, shortages of space exist in every space category for every department. Currently there is a 49% deficit of space for these units. For the most part, existing teaching laboratories are utilized very well with little to no room for additional growth. There is a shortage of research space for faculty and students, and other departmental spaces are also in short supply.

## Teaching Laboratory Analysis

---

## 2.0 TEACHING LABORATORY ANALYSIS

### Methodology and Assumptions

As an integral component of determining the number of teaching laboratories needed at the target enrollment mix, an analysis of the individual laboratories was completed. For the most part, the analysis is in step with the space quantification in the pre-design study. The underlying growth assumptions are as follows:

#### Fall Student Credit Hour Projections

		2008	2009		2015		2020	
		Student Credit Hours	Student Credit Hours	Percent Change (08 to 09)	Student Credit Hours	Percent Change from '09	Student Credit Hours	Percent Change from '09
<b>Biology</b>	Undergraduate	9,811	9,824	0%	10,122	3%	10,352	5%
	Graduate	252	262	4%	262	0%	262	0%
	<b>Total</b>	<b>10,063</b>	<b>10,086</b>	<b>0%</b>	<b>10,384</b>	<b>3%</b>	<b>10,614</b>	<b>5%</b>
<b>Chemistry</b>	Undergraduate	6,743	6,506	(4%)	6,698	3%	6,846	5%
<b>Geography / Earth Science</b>	Undergraduate	2,688	2,800	4%	2,883	3%	2,946	5%
<b>Microbiology</b>	Undergraduate	2,076	1,938	(7%)	1,998	3%	2,044	5%
	Graduate	119	84	(29%)	84	0%	84	0%
	<b>Total</b>	<b>2,195</b>	<b>2,022</b>	<b>(8%)</b>	<b>2,082</b>	<b>3%</b>	<b>2,128</b>	<b>5%</b>
<b>Mathematics</b>	Undergraduate	8,915	9,713	9%	10,000	3%	10,221	5%
<b>Physics</b>	Undergraduate	2,519	2,725	8%	2,806	3%	2,868	5%
<b>TOTAL</b>	Undergraduate	32,752	33,506	2%	34,507	3%	35,277	5%
	Graduate	371	346	(7%)	346	0%	346	0%
<b>TOTAL</b>		<b>33,123</b>	<b>33,852</b>	<b>2%</b>	<b>34,853</b>	<b>3%</b>	<b>35,623</b>	<b>5%</b>

The student credit hour projections shown in the table above were provided by discipline from UW-L. The projection is a straight line projection of five percent (5%) growth from Fall 2009 to 2020 in undergraduate credit hour production for all disciplines. There is no graduate growth projected. However in reviewing the total, undergraduate plus graduate student credit hours, it still results in a projected five percent (5%) growth. This growth percentage was used to project the number of students for each course.

In projecting enrollments on a course-by-course basis, the projected course enrollment was always rounded up. For example, for Fall 2009, there were 16 sections of BIO 312 with a total enrollment of 383 students. Increasing the 383 students by five percent creates 402.15 students. Rounded, this calculation produces 403 students.

Second, the number of stations programmed per room is a product of pedagogy. For 14 labs (35% of the 40 labs programmed) the number of seats increased from the existing number of seats in the current laboratory. This increase was anywhere between two to six seats per lab. As a percent of existing capacity, these increases ranged anywhere from a 7% to a 33% increase – the most common being a 20% increase. The net result of the increase in stations (most commonly from 20 to 24 seats per lab) combined

with the increased course enrollments is that for many courses, the number of sections to be taught does not increase as the projected capacity of the lab will accommodate the increased enrollments. In fact, in a few cases it reduces the number of sections needed.

Finally, the University of Wisconsin System utilization goals for teaching laboratories are 24 weekly room hours (WRH) at 80% student station occupancy. This results in a weekly seat hour goal of 19.20 hours per seat (24 WRH X 80% occupancy rate). As can be seen in the Teaching Laboratory Analysis following, most of the units average over 80% occupancy rates. During the last on-site work session it was decided that the sciences wanted to achieve higher occupancy rates. The end result is that the capacities of the courses were raised to just a couple below the capacity of the room ending in occupancy rates ranging from 85% to over 90%. Planning for occupancy rates, this high allows for the lowering of weekly room hours for some rooms — the outcome of which is maintaining the 19.20 seat hour target. Throughout the Teaching Laboratory Analysis these adjustments were made on a room by room basis.

### Comparison of Program to the Teaching Laboratory Analysis

The Teaching Laboratory Analysis projects how many laboratories are needed based on the courses taught in a particular lab for that discipline. It does not make adjustments for changes in pedagogy or curriculum. What is important in the analysis is the bottom line for each discipline. For example, Biology is showing a need for 11 teaching laboratories, which is the number of laboratories allocated; however, the breakout of those labs is different between the analysis and the program. The analysis calculates a need for four introductory biology labs and two anatomy/physiology labs for a total of six labs, but the program shows a need for three introductory biology labs and three anatomy/physiology labs. The program is taking into consideration that the introductory biology labs can be scheduled more hours with minimal

impact on overall scheduling and faculty load, but the anatomy/physiology labs have more scheduling and faculty constraints and will require three labs to accommodate the curriculum and scheduling issues

For all disciplines the number of laboratories projected is the number of labs programmed, except for Chemistry. In Chemistry, the one lab that did not project the same number of labs as the program is analytical chemistry. This lab shows projected use of 31 hours, which can be accommodated in a single lab and its supporting space. Chemistry had a couple of other labs that showed projected use of 25 and 31 hours, biochemistry and organic chemistry respectively. In both of

#### Comparison of Program to Teaching Laboratory Analysis

	Fall 2009 Existing		Building Program		Increase / Decrease		Comparison of Program to Analysis	
	No. of Labs	No. of Stations	No. of Labs	No. of Stations	No. of Labs	No. of Stations	Projected No. of Labs*	Difference
Biology	7	190	11	264	+4	+74	11	+0

Physics	4	116	5	148	+1	+32	5	+0
<b>TOTAL</b>	<b>29</b>	<b>797</b>	<b>40</b>	<b>1,046</b>	<b>+10</b>	<b>+249</b>	<b>39</b>	<b>+1</b>

\*From Teaching Laboratory Analysis

these cases, the number of labs projected reflect the level of study and the types of activity (scheduled and non-scheduled) that is expected to occur in them. Argument could be made either way as to whether or not two analytical labs are needed. When the program space allocation is revisited after project enumeration, additional meetings with faculty can occur to clarify these issues.

### **Teaching Laboratory Analysis Detail**

The following eight pages show the detail of the teaching laboratory analysis. The analysis is grouped by program and then by a combination of laboratory discipline and room number. For each lab, the fall and spring term utilization is shown. On a lab-by-lab basis, the courses from the heaviest scheduled term are the courses used to illustrate that term's use and projected use. The actual number of sections, course capacity, weekly room hours (WRH) and total enrollment for each course are listed. Then the enrollments are increased by five percent (5%) and the course capacities are revised so that a 90% or better student station occupancy is achieved based upon the projected size of the laboratory. Achieving a high student station occupancy rate was discussed and subsequently approved by University officials.

The projected enrollment is divided by the revised course capacity so that the number of sections can be determined. The number of sections is multiplied by the weekly room hours for the course (based upon the actual WRH from the fall or spring term) so that the total weekly room hours can be calculated. The total WRH is divided by an adjusted weekly room hour goal ranging from 19 hours per week to as high as 24 hours per week. The hours are adjusted relative to the projected student station occupancy which ranges anywhere from 80% to as high as 95%.

## **Teaching Laboratory Utilization Analysis**

---

### 3.0 TEACHING LABORATORY UTILIZATION ANALYSIS

#### How is Utilization Determined?

The utilization of teaching laboratories was examined using UW-L Fall 2009 and Spring 2010 course and facilities data. Understanding how teaching laboratories are scheduled and utilized provides the foundation for determining how many teaching labs are needed. The number of student stations for each teaching lab was initially provided in the facilities inventory and adjusted based upon field observation of the consultants. Scheduled use is defined as use verifiable through the registrar’s course data.

The utilization analysis reviews average weekly room hour use and student station occupancy percentages. A weekly room hour, not to be confused with a credit hour, is defined as the length of time a course meets (end time minus start time) times the number of days per week throughout the semester. Student station occupancy is defined as the number of student seats filled divided by the total number of student seats in the room when the room is scheduled.

The utilization of a room is determined by calculating the average enrollment of the courses taught in a room along with total weekly student contact hours, weekly room hours, and student station occupancy percentage. Weekly student contact hours are calculated by multiplying the enrollment of a course by the weekly contact, or room hours, during which the course is held. Weekly room/contact hours are determined by calculating the number of hours a course meets (start and end times) and multiplying the result by the number of days the course meets each week. Both of these factors are totaled on a room-by-room basis. If a course does not meet for a full term, the number of hours for a room is prorated by the number of weeks in a term.

$$\begin{aligned} \text{WEEKLY ROOM/CONTACT HOURS (WRH OR WCH)} &= \text{No. of Days} \times ((\text{End Time} - \text{Start Time})/60) \\ \text{WEEKLY STUDENT CONTACT HOURS (WSCH)} &= \text{Students} \times \text{Weekly Room/Contact Hours} \\ \text{WEEKLY STUDENT CONTACT HOUR CAPACITY} &= \text{Student Stations} \times \text{Weekly Room/Contact Hours} \\ \text{STUDENT STATION OCCUPANCY \%} &= \text{WSCH} / \text{WSCH Capacity} \\ \text{HOURS PER SEAT} &= \text{WSCH} / \text{No. of Student Stations} \end{aligned}$$

The student station occupancy for a room is determined by dividing the rooms weekly student contact hours by the room’s weekly student contact hour capacity (a course’s weekly contact hours times the room’s number of student stations).

#### Teaching Laboratories Defined

Teaching laboratories are defined as rooms used primarily by regularly scheduled classes that require special purpose equipment to serve the needs of particular disciplines for group instruction, participation, observation, experimentation, or practice. Once a room is classified as a teaching lab it usually has utilization expectations.

### **University of Wisconsin System Teaching Laboratory Utilization Expectations**

The University of Wisconsin System (UWS) utilization expectation for teaching laboratories is 24 periods or hours per week of for credit scheduled use. Sometimes the credits hours are assigned to the lecture portion of the course. The 24 hours per week criteria should not be interpreted as an expected utilization average for all laboratories. It is a target before a second laboratory of the same type is justified. UWS expects laboratories will be used at full or nearly full seat capacity.

It is typical for the scheduled weekly room hour expectation for teaching laboratories to be less than the scheduled use of classrooms due to the need for preparation time of specialized equipment prior to class. Conversely, the student station occupancy is normally higher as the number enrolled in a laboratory exercise is more closely monitored, safety being a key reason as well as the limitation of faculty observation.

### **Which Teaching Laboratories are Included?**

With a few exceptions, almost all the teaching laboratories identified by the University as teaching labs are included. The exceptions are as follows:

- Chemistry Room#s-418(Chemical Analysis Computer Lab); and 461 (Instrumental Chemistry-while used for some scheduled use, its primary use is support to other laboratory activities)
- Physics Room#s-206(Optics); 208(Holography); and 210(Advanced/Experimental Physics)-these laboratories had minimal scheduled use, if any, and are used for advanced experimentation
- Radiation Center Room#s-37(Sealed Source Lab) and 39(Open Source Lab)-while these laboratories are used for some scheduled instruction the majority of their use is as support to other laboratory activities, disciplines, and research

These laboratories have been identified either as laboratory service or as open laboratories for purposes of this study. As mentioned earlier in this study, the Physics' Education Workshop Lab was relabeled as a Science Methods Laboratory and is shown under Miscellaneous Instructional Spaces.

### **Teaching Laboratory Utilization by Program**

There are 28 teaching laboratories included in the utilization analysis. Chemistry and Biology have the greatest number of teaching laboratories at 8 and 7 respectively. For Fall 2009, the average scheduled use of the laboratories included in this study is 22 hours per week at 86% student station occupancy rate (the percentage of seats that are filled when the rooms are scheduled). For Spring 2010, the use is only slightly lower at 21 hours per week with an 82% student station occupancy.

**Fall 2009**

Biology, Chemistry, and Mathematics were scheduled the most at 29, 24, and 24 hours per week, respectively. The Misc. Instructional Space and Chemistry labs have the highest student station occupancies at 100% and 92% respectively. Physics and Biology also have very good occupancy rates at 88% and 86%. The lowest scheduled laboratories are in the Misc. Instructional Spaces and Geography at five (5) hours and 16 hours per week. In the consultant's opinion, none of the programs have poor occupancy rates; nevertheless, Mathematics has the lowest occupancy rate at 76%.

Biology had two laboratories with over 40 hours of scheduled use – Room #'s 348 (Introductory Biology) and 112 (Anatomy/Physiology). Likewise, Chemistry had one laboratory scheduled at 40 hours per week (Room #402 – General Chemistry). Half of all the laboratories are scheduled 24 hours or more with one Biology lab reaching 44 hours of scheduled use. About 60% of the labs have student station occupancies of 80% or more. Three of the laboratories exceed 100% occupancy rates in that there are more students enrolled in the courses than there are student stations. These laboratories are in Chemistry and Microbiology.

**Teaching Laboratory Utilization Analysis Summary - Fall 2009**

Department / Program Unit	No. of Rooms	Average Room Size	Average ASF per Station	Average Section Size	Average Weekly Room Hours	Hours in Use Student Station Occupancy %
Biology	7	1,134	43	22	29	86%
Chemistry	8	1,226	58	19	24	92%
Geography & Earth Science	4	1,001	32	25	16	78%
Mathematics	2	782	17	34	24	76%
Microbiology	4	998	43	17	19	79%
Misc Instructional Support Spaces	1	1,140	29	40	5	100%
Physics & Astronomy	2	1,335	48	24	21	88%
<i>Total No. of Rooms = 28</i>	<b>AVERAGE</b>	1,111	44	23	22	86%

**Weekly Room Hours:**

**Student Station Occupancy:**

**Spring 2010**

Spring semester use of laboratories tends to be lower on average than Fall semester use. Again, Chemistry, Biology, and Mathematics had the greatest amount of scheduled use and Misc. Instructional Space and Chemistry had the highest student station occupancies. As with Fall, the lowest scheduled laboratories are in Misc. Instructional Spaces and Geography. The occupancy rate for Mathematics drops considerably to a 54% student station fill rate.

Even though the average scheduled use is lower than the Fall there are still half of the laboratories that are scheduled 24 hours or more. Biology's Anatomy/Physiology lab has the highest amount of scheduled use at 42 hours per week. Over half of the laboratories exceed the 80% student station occupancy rate with the lowest of this group at an 86% fill ratio. The number of laboratories that exceed 100% occupancy doubles to six laboratories. These laboratories are in Geography, Microbiology, Misc. Instructional Spaces, Biology, and Chemistry.

**Teaching Laboratory Utilization Analysis Summary - Spring 2010**

Department / Program Unit	No. of Rooms	Average Room Size	Average ASF per Station	Average Section Size	Average Weekly Room Hours	Hours in Use Student Station Occupancy %
Biology	7	1,134	43	21	25	81%
Chemistry	8	1,226	58	20	26	94%
Geography & Earth Science	4	1,001	32	24	16	69%
Mathematics	2	782	17	22	21	54%
Microbiology	4	998	43	17	17	82%
Misc Instructional Support Spaces	1	1,140	29	41	5	103%
Physics & Astronomy	2	1,335	48	20	19	74%
<i>Total No. of Rooms = 28</i>	<b>AVERAGE</b>	1,111	44	21	21	82%

**Weekly Room Hours:**

**Student Station Occupancy:**

**Comparison of Fall to Spring**

On the whole, most of the programs have lower utilization in the Spring than in the Fall. Chemistry, however, is the exception both in scheduled use and in occupancy rate. For Microbiology, while the average scheduled use drops, the student station occupancy increases by three percent (3%). Both Mathematics and Physics experience less scheduled use on average in the Spring as well as a significant drop in student station occupancy rates. Although Biology has the largest decrease in scheduled use in the Spring (about 15% less) they also had 21% more use than the next heaviest scheduled program. Even at 25 hours of average scheduled use, Biology exceeds the UWS hourly goal. They also had a five percent (5%) decrease in student station occupancy.

**Teaching Lab Utilization Comparison from Fall to Spring**

	Fall 2009			Spring 2010		Difference Fall to Spring	
	No. of Labs	Avg. Weekly Room Hours	Hours in Use Student Station Occupancy	Avg. Weekly Room Hours	Hours in Use Student Station Occupancy	Avg. Weekly Room Hours	Hours in Use Student Station Occupancy
