Electronic Overrides (Adds) thru 5th Day
Also known as "Class Permissions"

To use from start of registration through 1st week of semester
prorated for shorter classes

Before you begin, please note:

- **Classes shorter than a full semester class have prorated add/drop deadlines.** Check with the ADA or the Records office if you aren’t sure what the deadline is.
- **Once permission is added, student must go into their own account and enroll.** If class is closed, it will still look closed to the student. He/she will still be able to enroll if the class permission was placed correctly. Students must enroll before the expiration date expires.
- **Classes in the DYN session** (dated with unique start/end dates, otherwise known as dynamically dated classes) must use the paper drop/add form. The electronic permissions do not work on those specially dated classes.

1. **WINGS navigation:** Records and Enrollment> Term Processing> Class Permissions

2. On the search page, put in:
   a. **Academic Institution:** UWLAC
   b. **Term:** 2186 (Winter 2018) or 2187 (Spring 2018) or 2191 (Summer 2018) or 2194 (Fall 2018)
   c. **Subject:** CHM (prefix of course you are teaching)
   d. **Catalog Nbr:** 103 (course number of course you are teaching)

3. Click **Search.** When the course appears, make sure you are on the correct section of the class. If more than one section of a class is offered you will see 1 of ? on the right side of the top blue bar. Click the arrow until you find the correct section. Verify you are the instructor of the course.

4. **For courses with lab components,** it is the LAB that controls the enrollment. Make sure you put the override permission on the correct LAB section. Even if overriding a closed LECTURE section, put the permission on the LAB.
5. Go to the bottom of the page and enter the student ID (Starts with 8 or 9) in the Campus ID field.

6. Note the Expiration Date of the override and change it if you are limiting the time the student can use it. It automatically defaults to the last day students can add the class on WINGS for that term.

   a. After the 5th class day (prorated for shorter classes), you will also need to check the Permission Time Period box on the Permissions tab and change the Expiration Date (on General Info tab) to no later than the 10th day (prorated for shorter classes.) After the 10th day, late adds require instructor, department, and dean's office approval in paper/hard copy format.

7. On the Permission tab, click the box for the permission you are giving. Please note the Requisites Not Met permission will override ALL prerequisites. You need to be very careful with that box. Overriding admission to a specific program or class standing (sophomore standing, etc) must be given by the dean's office. Do not check that box unless you know the student is admitted to your program or has the necessary class standing. If a student does not have those prereqs you will still need to use the blue override form. Students also need the blue override form for audits, time conflicts, and/or overriding more than 18 credits.

8. If you would like to add a comment to track why an override was given, you can click the Comments tab and make an entry.

9. Click at the bottom of the page. Please let the student know they still have to register. A class permission does not register the student; it only gives them permission to register.

10. To give permission to another student, click the button on the bottom right to add another row.

11. You can monitor the overrides given to see when the student used the override or if they dropped the class after they initially added it. The status of "Not Used" does not necessarily mean the student is not enrolled. It may mean the student didn't need the override to get in. For example, if the class was closed when the student got the override, but another student dropped it before your student registered, the class status may have been "open" and allowed them to register without using the override.
