Validating your shopping cart

Validation is a handy new registration feature in your WINGS Student Center. Use this feature to check whether you meet all the course prerequisites before you register instead of during the enrollment process. This option gives you more time to make changes to your shopping cart and to obtain any needed overrides before your registration appointment begins.

Here’s how you do it:

1. **Put one or more courses into your shopping cart in WINGS.** If you already have courses in your shopping cart, go directly to the shopping cart by clicking “enrollment shopping cart” link under your current schedule on the homepage in WINGS.

2. **Click on the Plan tab.**
3. **Select** all the courses in your shopping cart.
4. **Click** Validate
5. **Review** your results. The red X means there is a prerequisite, time conflict, or instructor permission problem. For “Enrollment Requisites are not met” errors, review your Course History to figure out which course or requirement you might be missing. Speak with the department/instructor offering the course if you have questions about the prerequisites.

6. **Change** or keep courses, as needed.
7. If you add or change courses after your first validation, be sure to validate again to catch any new errors.

**Things to remember:**

- The message “The Requirement Designation Option was set to ‘YES’ by the enrollment process” means that the course is a general education or writing emphasis course and will show up with that designation in the Advisement Report. You don’t need to worry about that message as it will always come with a green check mark.
- Students are able to validate courses in their shopping cart through the 5th day of class.
