High Standards for all Students: A Look at the Common Core State Standards for Mathematics

Drs. Matt Chedister, Josh Hertel, Jenn Kosiak, and Jenni McCool
Mathematics Department
University of Wisconsin - La Crosse

The Common Core State Standards for Mathematics (CCSSM) define what students should understand and be able to do in their study of mathematics (p. 4). This colloquium will focus on how the lens of these standards can be used to build mathematical proficiency for all students. By focusing on specific mathematical tasks, we will examine how the CCSSM are designed to support development of conceptual understanding, procedural fluency, adaptive reasoning, strategic competency, and productive disposition. Additionally, we will discuss current events related to the CCSSM and their potential impact on the teaching of mathematics within our region. We hope to see you there!

Friday, February 27th
All Welcome to Attend
Time: 3:30-4:30pm
2205 Centennial Hall
